He also described two more ways of earning money using alternative methods which is awesome as well.

I highly recommend buying this if you're looking for an easy way making money online without having to invest big amounts of money.

All of the information is literally provided. You don't need to know anything about Pokemon or ebay at all. The author goes over it with great depth along numerous other tips and tricks. Including other monetizing methods. So if you can't sell the cards, at the very least, you will be still earning your money back and more. The only bad thing that I can think of about this ebook is probably the price, but the information in it is extremely worth it.

The seller was quick and easy to contact and I vouch for this ebook a hundred percent

Spoiler [\(Click to View\)](#)

Q: Why are you selling a method that can make you 350\$+ a month for only 15\$-22\$?

A: I'm selling this method to users for 15\$-22\$ because this can never be saturated and by selling this method I would earn 350\$+ month + my eBook sales money.

Q: Does this method involve eBay?

A: Yes this method does involve ebay.

Q: Do you do trades?

A: I do not do trades anymore.

Q: How can I contact you?

A: If you have questions about the ebook you can contact me and if you bought package #2 you can PM me if you need help.

Q: Can I get a vouch/free copy?

A: I am giving out 2 vouch copies, you may not ask for one. I will give them out to members that are HQ and trustworthy.

Q: Does this work worldwide?

A: Yes it does but I don't recommend anyone outside the US to buy this because when you send the Pokemon cards the shipping will cost allot. So I only recommend this eBook for people in the US.

Q: Do you need some Pokemon cards to begin with your method?

A: Yes you would need Pokemon cards but you can invest in buying cards if you don't have any cards (My eBook will tell you how to buy Pokemon cards). By investing in Pokemon cards you will earn allot more then you invested if you use my method.

Q: How do I buy your eBook?

A: You must post here then pm me using the special link -> [pmme=Pokemon Ebook&message=I would like to buy your Pokemon eBook, Please PM me back.][[/pmme]

If you need to ask any questions just post here, but if its important just pm me. ?

The method is very easy, the first one takes some time to set up but I can see it working great, the last two both are very quick ways to earn some money without wait.

Overall, I must say this would be more than a great investment if you are looking to make some good cash, the method can be repeated again and again.

I will also say, this method is more than very original, and worth the time to try it out!

Yes you do, you can invest in buying some if you don't have any. You will make much more then you invested and there are 2 other great methods.

So to do this method is there any "real life selling" involved or is it all done behind the computer?
Also, I am assuming it is a 100% whitehat method?

Yes this is 100% white hat, the only thing that's related to "real life" is you going to the post office to ship the cards. :)

EDIT: Still selling guys! :)

Although I have only skimmed through it, I can already tell that this ebook will be amazing.

All of the information is literally provided. You don't need to know anything about Pokemon or ebay at all. The author goes over it with great depth along numerous other tips and tricks. Including other monetizing methods. So if you can't sell the cards, at the very least, you will be still earning your money back and more. The only bad thing that I can think of about this ebook is probably the price, but the information in it is extremely worth it.

The seller was quick and easy to contact and I vouch for this ebook a hundred percent.

You can request for carrier pickup to pickup your packages for what ever day you choose. Just set the packages on the door or in the mailbox if they will fit in there and your mail carrier will leave a receipt saying they were picked up.
