Just post here saying you want it and I'll PM you with the download link (mediafire).

You will get a .PSD file, open it in Photoshop and use the TEXT TOOL to edit the text, I don't recommend scavenging through the layers to change text. And you should know how to overlay images.

If you're finding that you don't have enough space to type in the 'Text' areas then feel free to change the font size.

Also, any feedback is appreciated!

Do not remove the watermark at the bottom if you are going to use this.

Sent the .PSD to you.

Still giving out the download link. Just post here.

Very sexy :) Should make a service of this

Neel - January 13, 2012, 1:20 pm

Nice thread design OP. Could I get it please? Thanks!
