You should definitely give some prices for 1/3/5/10/100 cards, at least with PP/BTC !

Well, I have 10 x 50 USD right now, I don't think I will be restocking in the future.

Are they carded or smth?  
What's the price for paypal or bitcoin?

Is there some sort of region lock on these codes?  
I remember purchasing keys for XBL and they were like USA only.  
Let me know if these can be used in the EU, Netherlands.  
If so, I'm very interested.

Sorry guys for late reply. I updated the price to 40 USD/code (BTC only). These will work in USA/LatAm only afaik. They are not carded, I have serial codes as well. May be used even 10 years from now.
