Thread: [My teacher get angry when we talk about hacking](#)

Mafia owner - January 15, 2012, 9:22 am

Lol in the class when we talk about hacking teacher gets angry, my ICT teacher have degree in computer science and programming. he told us he never hack, i always ask him hacking question he gets angry loll.

Heyzen - January 15, 2012, 9:23 am

May I ask what no lifer talks about hacking in school?

Okazaki - January 15, 2012, 9:25 am

Yehhh thats great talk about hacking in school then if you get in trouble for anything POW character reference.

You sound like a fool, but your teacher also sounds like a fool.

Addictionz - January 15, 2012, 9:27 am

Talking about hacking at school? I don't even tell people I have spent months browsing Hackforum's going to bed at 4am and staying awake countless days. Once I hacked the school administrator and got suspended though...

Nawk - January 15, 2012, 9:29 am

I discuss methods to get away with murder with my teacher. He is a book of knowledge on the topic.

I had tried to hide my interest in computers in school, but people eventually found out due to my high grades in the subject and my science fair projects. Maybe also because I shared pirated CDs so my friends don't have to buy them from the school board.

Anyway, sometimes they ask me strange questions and I get involved in weird conversations.

Quote:[Friend] Can you teach to do hacking?

[Me] What do you want to hack/ mean by hacking?

[Friend] I dunno, anything. Can you teach me how to hack facebook and/or emails?

[Me] explain about rats, keyloggers, and phishers

[Friend] *Looks like dumb shitbag*

And another personal favorite:

Quote:[Friend] Hey do you have any programs that hack facebook?

[Me] *explain how stuff works*

WinnerDinner - January 15, 2012, 9:38 am

Talkin about green CMD, i see what you did there.

P arkour - January 15, 2012, 10:04 am

my teacher was discussing suicide to us. was pretty wierd and i donno how we got onto it but he told us to park in a small garage or something and turn your car on. then just go to sleep.

never did see him again :/

jk

She gets angry because she knows your a skid and can't do shut

Major League - January 15, 2012, 10:34 am

This annoys me too, because hacking is part of the real work and is not something that should be swept under the bush. This would be similar to a geolgy teacher, when asked about earthquakes turning into an angry troll.

My college tutor was awesome when I did networking and PC repair, he used to flood Google with lame ass ping requests XD Everyone was so shocked he was doing it, I just laughed at him LOL

Velocity - January 15, 2012, 10:48 am

Lol I talk to my computers and programming teacher at school. He has a PHD in computer science. I talk to him about hacking all the time. He answers all my questions and doesn't mind discussing it with me. He has asked why I'm interested in this type of thing but I told him I find it all so interesting and he said he understands. He's a really cool guy. He actually has a company where they recover websites for people if they've been hacked so he knows a lot about hacking. It's awesome!

Fiery Dreamer - January 15, 2012, 10:50 am

My teacher just makes jokes about it. He knows I play around with security and I have pulled a few pranks on occasion, but I haven't done anything too harmful.

She probably gets pissed cause she's an Uber 1337 hacker and just can't talk about it. How infuriating.

Moon Shiner - January 15, 2012, 11:17 am

I think its funny

I talk about hacking all the time

Mostly about FB accounts

This made me lol so hard idk why but thanks :k

ibioz - January 15, 2012, 11:49 am

My teacher tried teaching us about the internet. He failed. (He didn't know what a hacker was)

Haha this kind of stuff is so true. When you actually explain to them what is portrayed as hacking in the media and what it actually is they are mindfucked.

It's more than just pressing a few buttons.

Your teacher is retarded. Then again you sound like a skid.

White hat hacking is ethical and used to test for vulnerabilities. Why would he be mad at someone who could do what an antivirus could do, manually?

Founder. - January 15, 2012, 12:10 pm

My history teacher gets all mad and has a tantrum when I bring up Call Of Duty.

Raees - January 15, 2012, 12:37 pm

O come on! you can't ask him in the class. It will make him look bad if he supports you..

Oceanic - January 15, 2012, 12:55 pm

I remember OP, he just looked like a skid talking big. I wish I would of listened to him and my facebook account would have never been hacked. ?

You should probably see a doctor about that.

And I mess around with computers at school, I found my schools admin page etc. So they probably know something.
