Where is the dollar sign in the picture you posted then? I see 'CTS', not a dollar sign. And what is with you and making heated flame wars over semantics? You know the price of the bots, so quit creating arguments over petty crap. if u buy normal installs, he does botkill all after loading, when buy updtes he loads from exploitpack he says, not sure about that but its very bad service, waste of time and money.

Well i load from andro, so you cannot botkill, that is a fact feel free to ask around, second coming from pack is loads, 1k loads will wind up going down since not all stick, and then on top of it you are using an irc bot that is not stable to begin with that is why you have lost all. Plesae learn the difference between loads and installs.

If you buy bots from ANY seller and expect not to get bot killed (either by the seller himself or someone with Insom or Barracuda), then you're going to have a really bad time.

Very true, the one private bot i have i cannot botkill, but i sell to around 20+ people daily and then some clients who take down large amounts, i cannot help if they decide to botkill, so it is on you ot have a good stable bot that cannot be botkilled and so on.

Don't mean nothing if he used Andromeda, only thing that will do is stop HIM from getting bottkilled.

You still have other customers to worry about that might use the botkill command especially if you use/buy a bot from here as they are so easy to remove.

COrrrect but andro is not as stable as you think dont let it fool, you andro is the #2 bot i use i have a #1 not sold here, that keeps my bots if anything was to happen to the ones on andro, but i tell people and will say again i sell to over 20+ people daily and the loads that me and my partner get are fresh but you still have that chance of getting a bot that was sold mroe than a few times to someone else, that is why i ask when i sell and if you say you use a rat i dont take your sale.

Andro may not be the best but it is a damn good bot for herding, and sure there are obviously better bots out there which all come at a very hefty price\$\$

Anyway this is what not many people understand about installs.
