Thread: [Say NO to GoDaddy and move your domains ! 1and1 domains \(28 days wihtout payment\)](#)

injectioninfection - January 17, 2012, 1:23 am

I'm sure there been many threads in here about SOPA, and then probably many also about GoDaddy being a SOPA supporter.

But I guess there isn't really a 'Domain' forum in the webmaster section.

But there should almost be a sticky and everyone should say NO to GoDaddy and anyone that uses, transfer there domains.

If your website infringes on copyright, GoDaddy has the right to shut it down.

1and1.com has BETTER prices, do not support SOPA, you can register your domain TODAY, without a payment, and have 28 days to pay.

Are you just trying to advertise your site? lol

I use godaddy.

I dont care, they're cheap and supports always there.

Hell no am I moving to 1and1... Shit support and hard as hell to cancel auto-renewal.

Flipybitz™ - January 17, 2012, 1:32 am

Yay, fuck SOPA, fuck the Government, fuck the police, fuck the world!

There's a way with Intuit to get a free 1 year trial of any domain. I.E. my flipybitz.com domain is free <3

Rather move to namecheap then 1and1 LOL

Namecheap is against SOPA AND HAS GREAT SUPPORT AND A GREAT TEAM Fcuk godaddy with there shit verification bs

Open Source - January 17, 2012, 2:18 am

what ever it may be...but godaddy suits me best ;)

ShadyLTD - January 17, 2012, 2:33 am

1and1 is fucking pure shit dude. I will NEVER use them again, with the support and stupid ass contracts they have. No thanks.

1and1 is by far the worst domain registrar there is. Switch to moniker if you want to switch to something.

Uncomplicated - January 17, 2012, 3:53 am

Tons have people have moved their domain from Godaddy to Namecheap because Godaddy was supporting SOPA.

@OP, bad try at advertising.

+kiwi.Kuddiie - January 17, 2012, 9:41 am

I use netfirms and namecheap, fuck 1and1 lol!

Exit - January 19, 2012, 3:18 am

lol. Here i was planning on buying a domain from 1and1.

Didn't know 1and1 had many bad remarks.

Intuit kicks a55. It's free and well, it even allows us to transfer the domain.
