There are plenty of email bombers readily available on this site. I would recommend going and finding one of those.

Why do you come here, only have 4 posts, and ask us to attack someones phone for a reason which you give us no details about?

What did he do to deserve this?

Why are there so many typos in your post?

If you want there to be a chance of having us help you, might as well give us a nice form, some pictures, and a good ass reason for helping you.

Just use an SMS Bomber or and Email Bomber. It's the easiest way. Nobody will help like this, trust me. We won't randomly spam someone.
