Superpoints Network is a great GTP site that requires next to no work. Mostly just signing in to click the Superlucky button and referring friends. You can also earn points from luckymail, surveys and offers.

500 pts = \$5 Paypal or Amazon.com/.ca gc. You can win up to 450 pts per click and luckymail!

Signing Up & Avoiding Losing Your Account:

1. Don't sign up with an obviously fake name. There are people who post suspected fake names that show up in recent winners on the Superpoints Facebook page for Superpoints to investigate. Examples of reported names: Subsc M., Pink I., No N.
2. Limit one account per household or IP address. Don't refer anyone who lives with you.
3. Confirm your email and complete your profile for basic status. As a basic member, you will receive 30 clicks a day instead of 5.
4. Accounts expire within 30 days of inactivity, so play everyday

Earning Points:

1. Click the Superlucky button. Each click can win you up to 450 pts.

2. Opt into surveys and luckymail in your Communication Preferences. You will be emailed surveys as they become available and sent one luckymail a day. Each luckymail is a guaranteed win!
3. Check the videos. Occasionally, there will be a video up for 1-2pts.
4. Do offers. There are 2 offer walls with tons of offers and tasks.
5. Get referring. Each referral who has completed their profile and confirmed their email will get you 25 pts. You will also start receiving matching wins after reaching Gold status
6. Enter the weekly Friday Freepoint contest. Details are posted on . The last one was about taking a picture with something you bought with your Superpoints money. The winner got 200 pts and the runner up got 50.e

Referring Friends:

1. Send your friends an email invite or post your invite links around.
 2. Refer 2 friends for Gold status (50 clicks + matching wins!).
 3. Refer 5 friends for Platinum status (100 clicks + matching wins!!).
- Your referrals must confirm their email and complete their profile for you to have your membership upgraded

Check out this page for your upgrading options!

Though this may seem like a decent place and it really isn't that bad. I feel as if the points are in small portions.
