Thread: [\[Free Service\] Anime Rendering](#)

Marshmellow - January 19, 2012, 2:13 pm

What is this service?

I'll be attempting to create a render of any anime character in a picture of your choice.

This is as much for my sake as it is for yours, and is primarily for practice reasons, as well as me wanting to have more renders in my collection.

What does this mean for you?

This means that if you feel like having a render of a picture, post it asking me to do so for you. I have no guarantee of quality whatsoever, as I can safely say that I'm not the best at this.

Remember: This means that you will have to provide me with the actual image you want me to create a render of.

Examples:

These are my last couple of renders.

Only one of them is the actual file, the other is just print-screen'd off my image viewer.

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

Extra:

I'd primarily like to focus on anime renders. Mostly because that's what I will be doing anyway.

I'm posting this here as it would be great to be able to help people whilst doing something I'd be doing for fun anyways.

Marshmellow - January 19, 2012, 4:42 pm

I'm not quite sure, but either I was unclear, or you misunderstood.

A render is any object that has been cut out from the background of it's original picture, basically commonly used when creating signatures and other graphics.

YERANUK - January 19, 2012, 4:54 pm

Maybe you should ask them to provide the high quality snapshot of the anime scene. Don't see how you would find some on google images.

It's already stated, but you should make it more clear.

Kamui - January 19, 2012, 4:56 pm

I'll let you know when my BluRay comes in I need you to render 1 or 2 images from Clannad

You accidentally, this thread twice. Good service, I remember you showing me the full pic for the haruhi one, nice render ;P

YERANUK - January 19, 2012, 5:30 pm

Here is my request. Looks easy to me.

http://konachan.com/image/3330660d86bf19e6ab41d1e8fc81d9f4/Konachan.com%20-%2038004%20enma_ai%20jigoku_shoujo.jpg

changed the pic, this one will be good practice for hair.

Drengroth - January 20, 2012, 12:06 am

Hey. This is nice of you to do.

I've been trying to do one, but i cant seem to get the hair right. Perhaps you would be able to do it?

[http://i43.\[censored\].com/1430v3l.jpg](http://i43.[censored].com/1430v3l.jpg)

The glow isnt needed if you are not able to do it, i plan to change that anyhow.

Appriciate it a ton, and you're my hero :)

Marshmellow - January 20, 2012, 1:08 am

Anyways, nice service you have here. :D

Marshmellow - January 20, 2012, 1:56 am

Yeah, it didn't work for me either, until a few minutes ago. Glitch.

And thanks ;D

Do you want the thing she's lying on included? THat butterfly pillow/matress/soft thing...

Because the hair fades into darkness under it, meaning that the hair won't turn out completely right if not, and how she is lying is shaped by what she's lying on.

good job and i just found this which i call Zombie + Bat XD Spoiler [\(Click to View\)](#)

[img]http://www.hfimage.net/images/hdl84sys97ziklceh2o.jpg[/img] and can someone tell me what i do to get the [spoiler] thingy

Marshmellow - January 20, 2012, 8:29 am

To use a spoiler, do

Code [spoiler]

Text or image here

[/spoiler]

You basically open it with [spoiler], and close it with [/spoiler] to determine exactly what is inside.

And I'll do that, but there's no guarantee it will turn out nice. After all, there are lines indicating that it is in motion that are near transparent next to it.

TheElo124 - January 20, 2012, 9:21 am

i chose it cos i think it would be a tough one and thx

Marshmellow - January 20, 2012, 9:31 am

Just to make it clear, I'm not doing this for the sake of a challenge. I could find challenging pictures myself.

Don't ask me unless you actually want the render ;P

The black spots can go, you decide if you want to do the stars.

Done with Shana's render. Back home from Oslo, so I have some more time on my hands.

Spoiler [\(Click to View\)](#)

Looks crappy on a dark background. Can do nothing but apologize for that, except for complain about how the background and the hair was too similar, with no clear showing of which was which.

And @Loli, the stars don't really work without the giant black circle, so I might as well remove them as well ;)

Done with another render

The first thing I did was to google "Air Gear Manga Volume 1 Cover".

<http://www.anymanga.com/manga/air-gear/001/001/000-cover.jpg>

Happeh - February 5, 2012, 2:57 pm

You're pretty good at this. Very clean rendering.

Where did you learn to do this? :3

Marshmellow - February 5, 2012, 3:19 pm

I never did.

First, I started off using the magic wand, or whatever that tool is called. I found out that the rendering it did was low quality, and figured I'd do it better manually.
Afterwards it came by itself.

SavageBoys - February 5, 2012, 3:47 pm

Also when you get a slight white outline use layer > Matting > Defringe @1px to remove it, works on most renders.

Sometimes you will find that images have bleeding that causes colors to overlap the edge of a character, best thing to do is select a nearby color and make another layer set to hue/color to fix it.

Marshmellow - February 5, 2012, 4:41 pm

I just feather the slight white outline away. Usually works fine.

And I haven't really put myself into bleeding or anything like that.
I'm just the kid with the scissors and glue stick.

Fox - February 5, 2012, 4:54 pm

Thank you very much for rendering the first image! :D
I re-sized the second one to a reasonable size (546x1252).

So, can you please render that one?
<http://i.minus.com/ibg0s8luQahBVj.jpg>

Marshmellow - February 5, 2012, 5:57 pm

Yeah, I'm already working on it.
A 2000 px version of it is halfway done.
The thing is that I stop halfway to give myself a break, then not picking it up for a day or two ;P

Agreed with this, it helps a lot.

I hope you use the pentool though and not the eraser.

Marshmellow - February 6, 2012, 2:40 am

Of course.
The pen tool is faster, simpler, easier on mistakes, and generally better.

You're so much better at me than this.

There are literally chains all over, and they're so intricate and detailed that I honestly can't be arsed. Even if I tried, I'd likely do a bad job with them anyway, when looking at the smallest ones.

(Feb 20, 2012 03:11 PM)pnt101 Wrote: ([CITE](#)) Hmm guess the best way for a HQ render is with the pen?

Yup. Rendering an image is in no way difficult, just in many cases REALLY time consuming..

Marshmellow - February 20, 2012, 3:48 pm

Mhm.

The skill lies within doing it precisely within a reasonable time.

I've got the latter down, I'm more worried about the former.
I tend to slice off too much.

Yui Hirasawa - February 20, 2012, 4:05 pm

Yush :3

Yui has been practising her simple nooby rendering idea.
It's going good!, but.. just is very time consuming ._.

Meh. It was time consuming in the beginning, but it got better.
I'll do most images in a few minutes now.

SavageBoys - February 20, 2012, 4:37 pm

Ah yes, the transition between making many anchors to make fewer more precise ones.

Makes a world of difference in speed.

For example, when rendering hair it is a bad idea to start at the tip and move inwards, if you start at the inner part and move along the hair then jump to the next hair and close it off in a triangle shape its much cleaner/faster.

Marshmellow - February 21, 2012, 1:36 am

Exactly.

I started off with a million anchors, now I'm only using a fraction of that.
And hair is tricky, especially as it in many cases fades into the picture.

Yui Hirasawa - February 21, 2012, 2:22 am

Yeah, I'm using lots and lots of anchors... ._.
But the result is nice.

Yui Hirasawa - February 26, 2012, 5:33 am

Here's an example of a render I did acouple of days ago :)

Anyone can feel free to snatch it ^^

Pft, signing your renders...

And quit hijacking my thread >.>

Yui Hirasawa - February 26, 2012, 5:26 pm

All in good fun Marshmellow ;)

Just thought I'd chuck in on here since this is the only render related thread i've seen o:
And I really started learning to do this because of this thread x)

Sorry buddy :3
Will stop nao.

Well, here is a picture I want rendered.

Spoiler ([Click to View](#))

Shouldn't be too much work I assume. Excluding the fact that I have 0 experience with this anyway.

It's watermarked.

I could probably try reconstructing the hair down there, but it's simpler for me to simply slice off the bottom part.

I'll see.

Slicing the bottom part off is no problem. Do as you see fit.

There you go~

Anime rendering: Isolating a character from an anime screenshot or picture and making it into a single picture. [Or something like that]

Anchors? How do you work with them 'cause I actually never heard of it. Regarding my earlier rendering request. Well, someone else kinda beat you to it so it is not needed anymore.

My apologies.

Marshmellow - November 12, 2012, 4:20 am

Anchors as in clicks with the pen tool.

And I'm ing this back up, it's for a good cause.

DarkShadowz - November 12, 2012, 3:25 pm

Are you willing to do video renders as well? (Basically free masking)

Marshmellow - November 12, 2012, 11:31 pm

I haven't really done anything like that before, but I can give it a try if you want. It'd be a nice thing to learn, as well.

juniiflow - November 12, 2012, 11:47 pm

Dude i want this cut-out, but they are a lot so take your time.

Marshmellow - November 13, 2012, 12:36 am

What resolution do you want them in?

Just so I know how thorough I have to be.

the same as i give them to you?

Don't lower/higher the picture resolution. is just some cutouts.

Marshmellow - November 13, 2012, 12:43 am

Alright, then. But that's gonna take a lot longer. Gettin' to it.

Rakshasa - November 13, 2012, 1:14 am

Marsh, if you want help with this service feel free to contact me ^-^

Anyway great to see you're relaunching this.

I can probably make you a mask. Nothing perfect but I've done a few before.

i am guessing you use Pen Tool on photoshop?

just zoom in and it would be easier. the bigger the picture the faster i cut-out at least for me...

If you kindly would cut out his body and jacket, would be lovely. Just ignore the belt.

Would be awesome if you could PM me it.

Thanks in regards mate!

Marshmellow - November 13, 2012, 7:41 am

Want me to just leave the belt out entirely, or do you want me to try to redraw the shoulder?

By the way guys, I mostly do this in or between classes, so it might be a bit slow at times.

Angel Beats! - November 14, 2012, 8:14 pm

Hmm... Starting to notice a pattern.. This was the same time of year Marsh was extremely active last year, and went on through December and then he left indefinitely in like january.

Marshmellow - November 14, 2012, 10:43 pm

It should be mostly okay. I need something to do between classes anyway.

I finished it, PMing you now.

As for junii, I'll do yours when I'm bored.

Marshmellow - November 16, 2012, 4:56 am

Only bothered doing one of these so far, as I'm still kind of annoyed at you.

Marshmellow - November 20, 2012, 12:28 pm

@Mio Akiyama

Forgive any flaws, I did this one with my tablet on my desktop.
