Thread: [NEED REPLIES ASAP...Can I put an link to a....](#)

kamz89 - January 19, 2012, 6:51 pm

Can I put a link to a pastehtml page, it is a loic basically on pastehtml created by anon hackers and they sent me an email requesting me to spread the link to knock down a website.

So can I put the LOIC link and off course in the upgraded members area?

Arete - January 19, 2012, 6:55 pm

I'm going to say taking down website's are illegal.

My main question is that is it allowed on HF?

We do have a section on Hackforums for taking down websites and website defacement. As long as it does not reach the limit of BlackHat activity, then it should be fine. Good luck spreading the link, just make sure it does not cause any harm to anyone, especially to the Hackforums members.
