Thread: [Hotmail Creator With Proxy](#)

nickman456 - January 20, 2012, 1:23 pm

I want someone to help me make a hotmail account creator.
But i want it to support captcha, it shouldn't be to hard.

I would pay you 20% of the sales i make :D

Gr0wlit - January 20, 2012, 1:28 pm

it isn't hard to do... how do you think to sell it?

Fewzy - January 20, 2012, 1:29 pm

How much knowledge of VB.net do you have ?

VOLTAGE - January 20, 2012, 1:29 pm

If you weren't sitting here saying you would pay the coder 20% of what you make from their work then i would consider whipping one up for ya. ++ You won't make anything from a hotmail account creator anyway.

nickman456 - January 20, 2012, 1:30 pm

Not very much. Maybe you could TV me?

Plus i go on 4 different botting forums. Very trusted, since my friend usually makes me bots.
I give him 20% also, but he quit :(

Anyways If you wanted to go on TV and help me.

I would sell the bot for probably \$5.00

So than i would pay you 20% of the profit.

Good money :D

Since it requires little work.

If you could by-pass captcha, than i could be like insanely rich and sell it for like \$20.

Than i would pay you 50%

O.o 5\$ for an hotmail creator?? OMG, do you think you can sell it seriously?

DBC support would also be pretty simple to incorporate into the app, but pricey.

Unless you expect a huge turn out, which i don't see happening. I would come to the conclusion that you shouldn't waste your's or anyone else's time.

Feminist - January 20, 2012, 1:32 pm

IF anyone here could code a captcha ocr that is accurate, they wouldn't hand it over to you. Keep dreaming. PS: They wouldn't also use vb

Fewzy - January 20, 2012, 1:33 pm

Anyway if some 1 can make a hotmail creator why would they give you the source / program and then let you sell it when they are only getting %20. They would sell it them selves

nickman456 - January 20, 2012, 1:37 pm

Yes. But you don't know where to sell it.
Because i know a lot of people who want it.

VOLTAGE - January 20, 2012, 1:37 pm

It's been done and released numerous times. I remember my first beer.

(Jan 20, 2012 02:37 PM)nickman456 Wrote: [\[CITE\]](#) Yes. But you don't know where to sell it.
Because i know a lot of people who want it.
I call bullshit. If you know how and where to market anyone can sell this just as easily as you could.

nickman456 - January 20, 2012, 1:40 pm

Yeah. Well if you help me make one, I could tell you where i sell them?
Than you could make your own and sell em?

superpink - January 20, 2012, 1:45 pm

\$5? Really wow, I know some people who would pay a \$1 or \$2 to make mass accounts, but not \$5, good luck with your search.

VOLTAGE - January 20, 2012, 1:45 pm

(Jan 20, 2012 02:40 PM)nickman456 Wrote: [\[CITE\]](#) Yeah. Well if you help me make one, I could tell you where i sell them?

How about you do the math and figure out about how much 20% of all your estimated sales will be and then i'll make it. But before i give it to you pay me the lump of whatever you come up with? That way i know i won't make it for nothing.

nickman456 - January 20, 2012, 1:49 pm

Well for every bot i sell. If i sold for \$5.00 you would get \$1.00

If it has proxy support, I know ALOT of people who will buy it.

It is a good program to have if it has proxies, since you can sell yahoo emails for around 1 - 2 cents per account.

G3O - January 20, 2012, 2:09 pm

? I do all the work and get a only 20% for every bin u sell. And You got no rep and 25 post (for now) and I/we don't know you. So how can I/we trust you?

And by the way this is the wrong section post to Buyers Bay.

VOLTAGE - January 20, 2012, 2:22 pm

Well, how many are you planning on selling roughly?

Lol, that's why i said what i said up there bud ;)

Kill4joy KJ-Vulcan Tools - January 20, 2012, 2:24 pm

<http://www.vulcantools.net/?mod=surveytools&tool=Hotmail%20Account%20Creator>

we sell it for 1\$ or offer a survey alternative, and it has proxy + dbc support.

System[X] - January 20, 2012, 2:36 pm

wow, i tell you what, ill make it for you for free, it will have proxy support and DBC to do the captcha for you, really its too easy to code, would only take like an hour or 2.

Seriously its too easy, infact use the search tool and im sure you will find a few thats already made and you can get them free.

I also don't think there are that many dumb people that would pay \$5 for it ot even \$20 with proxy and DBC support lol

Thanks

I call bullshit. If you know how and where to market anyone can sell this just as easily as you could. Are you high on something, sir? I don't know what world you are living in, but there are no free publically available hotmail/yahoo captcha bypasses.

Your clearly a deluded .NET kid. Good luck making algorithms for the OCR, you won't find any help on google.

He said he wanted OCR... It should automatically read the captcha with a success rate > 35% (This user will probably demand 90% or more accuracy though, lol....)

good luck

good luckWho needs help for something so simple? If you understand what you are doing it is easy. If you put enough time into it then it will be accurate.

<https://hackforums.net/member.php?action=profile&uid=747846>

Whine to him about it.

And just to clarify. I am far from a .net kid. I have made literally 1 app in .net frankly because i don't find .net not much of a challenge, it's too easy. I code in VB6 and C++. I code in those languages because i am mainly a malware related coder. For some reason .net coder's and everyone else hasn't figured out yet that .net is NOT a language that malware should be written in and that's what pisses me off about this forum, cool story?

fillobotto - January 21, 2012, 7:13 am

there's already a tut about hotmail creator on hf

BlueScreenof_Death - January 21, 2012, 7:22 am

This is not malware, this is a tool. Frankly vb.net is one of the best languages for tools because it is so simple to create.

I didn't say this was malware, i was just speaking in general buddy. I agree that VB.net is a quick to do and easy language, that's what i said above.

nickman456 - January 21, 2012, 10:39 am

Sooo Can anybody help me make a Hotmail Account Creator!?!?!?

xNeaples - January 21, 2012, 11:45 am

<http://www.youtube.com/watch?v=VHNvCX1vnGI>

This is one of my oldest tool, I'm going to take a look to the project soon , adding proxy e captcha support (I'll not buy an account), and I'll give this for free.

/Back in topic

Basically, if you add a webbrowser, it's pretty simple to add proxy support. For captcha support, it depends on which service you're going to use (decaptcher etc.)

Coleak - January 21, 2012, 12:39 pm

I hate this concept of, ill pay you a percentage of sales, becuae if the program fails to sell, guess who gets thrown under the bus, not the person who had it made for them (because come on, you know the other person will be doing 90% of thework), its the person who helped you out. Why dont you pay the person up front half, and then half after its done, then you can have 100% of the sales?
