100K usernames might be too much, btw, this is not a cracker, this is an account checker.

that is a false positive. It is 1/43 because of that. You can decompile it if you don't trust me, its not obfuscated.

xo03 - January 22, 2012, 2:18 pm

I wonder what would cause that... :/

Kill4joy KJ-Vulcan Tools - February 11, 2012, 10:31 am
Every so often, you can get ip banned from MC's website because it thinks you are trying to brute an account.

Japanese Congress - February 11, 2012, 10:47 am
