This program is designed for support staff as well as sellers. It is used to copy + paste commonly asked questions, so it will save support time. This requires administrative privileges because it stores the data in the registry.

Features:

- [x] Stores multiple answers and questions.
- [x] Allows you to add and edit questions/answers whenever you want.
- [x] Allows you to copy the entire answer into the clipboard.
- [x] Allows you to go directly to the Vulcan Tools website.

What you've been doing is truly amazing...

I'm jealous of your VB skills :(

The program itself was pretty basic to code. I just hope I can help support staff with this program.

irregardless, I do not pride myself based on whether or not my programs are advanced, but if they are useful.

I'm jealous of your VB skills :(

I learned how to do this in Intro to Visual Basic... If you're jealous, why don't you go study intro vb...

OP: Add something that allows you to import a .txt.

Allow users to create a .txt formatted like so:

1. Question 1
2. Answer 1
- 3.
4. Question 2
5. Answer 2
- 6.
- etc

That way laying it out is easier, then users can import it into your GUI.

Oo, That is a good idea. I may run into difficulties if there are enters in the answer though.

You can have them prefix each new line with something.

Hook3r - January 21, 2012, 3:48 pm

Seriously, I wish I had the time to learn it.

Kill4joy KJ-Vulcan Tools - January 21, 2012, 3:50 pm

See, i feel if I have specific instructions on how to format it, users might end up either messing it up, or taking too much time then to just manually c+p it into the program.

Shutdown. - January 21, 2012, 3:53 pm

Wow... YET AGAIN KJ, about to download. haven't been disappointed yet. :)

D??M! - January 21, 2012, 4:00 pm

Well you're not eliminating the other method, just creating a secondary for 'advanced' users.

Kill4joy KJ-Vulcan Tools - January 21, 2012, 4:30 pm

I see your point, irregardless, it would be good to implement in, specially for people with a lot of support staff. I will look into implementing this in, thank you.

herro prease - January 21, 2012, 8:07 pm

Another great tool! I hope that a lot of users found this amazing tool useful as much as I did.

Kill4joy KJ-Vulcan Tools - January 22, 2012, 7:36 am

Thank you, your support means a lot to me!

?Mephobia - January 22, 2012, 10:32 am

Tools will be coming very frequently! visit the site for all of them!

PurplePro - January 22, 2012, 10:34 am

Keep up the good work, Your doing awesome with your tools!

Kill4joy KJ-Vulcan Tools - January 22, 2012, 11:08 am

thank you, i really love everyone's support!
