Beaver Logger V1.3

Reviews From Customers:

(Dec 24, 2009 10:41 PM)Nulli Secundus Wrote: [\[CITE\]](#) I just purchased this keylogger and it works great. I've tested it on my own vista 64 bit operating system and logs are coming through very nicely. The screenshots are working perfectly as well and are very nice for seeing what the other people are saying such as in private messaging. I'd definitely recommend this with what I've seen so far.

(Dec 27, 2009 01:57 PM)Rob Wrote: [\[CITE\]](#) Alright here's my official feedback:

I just started receiving my first logs about 30 minutes ago (thanks to a little SE on FB) and they are very well organized and easy to read. The program was a breeze to set up and even so Beaver was there to help me out. The screenshot feature is a MUST. It really brings reality into the program. I would highly recommend the \$10 package as he has been talking about some killer features in the next versions. Looking forward to future versions and more releases Beaver. Thanks.

I want to buy, pm me your msn ?

pushl %ebp - December 29, 2009, 2:16 am

Hmmm, I might buy later on when I set up my Paypal. ? Keep up the good work.

Smithyy. - December 29, 2009, 5:29 am

Hey i've already purchased it, but can you pm me your msn please.

Frag - December 29, 2009, 1:59 pm

Beaver does this log passwords from everything? Like I used predator logger and it said MUST BE USING FIREFOX TO LOG PASSWORDS IF YOUR VICTIM IS NOT USING FIREFOX YOU WILL RECIEVE NO PASSWORD FILES. Or something of that matter.

CheGuevara? - December 29, 2009, 3:26 pm

I am very interested, and I have the money. The only thing that makes me doubt about this, is that my victims needs .NET Framework 2.0 or higher.. Maybe I'll get less people infected because of that.. I have no idea!

But I really want this.. But all I have left is 10\$ so I want to use it wisely!

supapig - December 29, 2009, 6:28 pm

it looks rly nice ;PP

Jamz - December 29, 2009, 6:29 pm

Nice job beaver, GL with sales, btw it doesnt steal steam?

alih92 - December 29, 2009, 6:50 pm

very nice, but what language is it coded in?

townpartier - December 29, 2009, 6:51 pm

Sounds good, i think ill pick up a copy :)

Beaver - December 29, 2009, 6:56 pm

vb.net

RollinThatDice - December 30, 2009, 3:12 pm

Hey beaver, The program looks awesome. I always love your programs. Thanks for everything you've made. Please contact my MSN (RollinThatDice@live.com) because I have a few questions for you before I purchase.

EvilMo - December 30, 2009, 8:10 pm

(Dec 25, 2009 05:20 PM)Beaver Wrote: [\[CITE\]](#) what feature do you need to see more of?
I like to have it uninstall itself after so many days or months. A cool calander would be great.

RollinThatDice - December 31, 2009, 12:44 am

@ EvilMo, Beaver was speaking to a specific person who asked to see more of the program before he/she buys.

Beaver - December 31, 2009, 1:32 am

To all potential buyers please bare withe me I just moved into my new place today and the internet has not been setup yet, so it may be a couple of days before I can complete any orders.

If you are interested send me a pm

Beaver - December 31, 2009, 12:09 pm

OK my internet is hooked up and i can orders again

Wayllising - January 1, 2010, 6:53 pm
