Thread: [good alternative to IDM ? internet download manager?](#)

Triple H - January 22, 2012, 1:19 pm

Any one knows a good alternative to it?

Just do not suggest download accelerator plus. Its SHIT. Any other good one?

I have had a good experience using Flashget, you could try version 1.9.6. There are 2 versions on the official webpage, but I prefer the 1.9.6 over the 3.3 version.

Spoiler ([Click to View](#))Code <http://www.flashget.com/en/download.htm>

Cheers

The most used downloader would be JDownloader & IDM currently if i'm not wrong.

I still prefer IDM than any other downloader but if you decided to try something new.

Try Free Download Manager, sadly too said its kinda like a rip-off of IDM.

hey you could use jdownloader or mypony

they are pretty good in my opinion

how do i know? - i own a RDP business lol my clients use it alot

Check out Free Dowload Manager. It is a little slow but otherwise not bad.

There is a relatively new product called EagleGet. Never tried by Google search shows that people like it - <http://www.eagleget.com>
