Thread: [Best Version Darkcomet 5.0 or Darkcomet 4.2 fwb ?](#)

FI0r1an - January 22, 2012, 1:20 pm

The best Darkcomet version is 5.0 or 4.2 fwb ? because 4.2 the restart PC not working , the pc does not restart is 5.0 the server beug when it is crypted.

david007 - January 22, 2012, 1:27 pm

im sure most will say 5 but id say 3.3 lol

Zalg0 - January 22, 2012, 1:28 pm

In my opinion its 4.2.

5.0 Has some small bugs.

Just try some out and see what you like the most.

xes39 - February 5, 2012, 7:03 am

i downloaded 4.2 and it wouldnt even open so id say 5.0 im new though:)

fluocariles - February 5, 2012, 7:15 am

more stable is the 4, but if you want use a funtionality of 5, you must be the 5 version, of course.

erypmav - February 5, 2012, 7:24 am

what about darkcomet 4.0 im using it. so is there any version better than this 1?

saviosaxx - February 15, 2012, 4:30 pm

If I have made server with version 4.2 DC...if i now download version 5 DC, the old server work?

friendsofgaf - February 15, 2012, 4:47 pm

im usein 4.2 i fined the most stable out of all of them..dc5 i found not stable but thats me

S.Girl - February 16, 2012, 3:43 am

more stable is the 4, i like Dark :P

NINJ4Z - February 16, 2012, 5:19 am

4.2 seems much better in my opinion.

esin - February 16, 2012, 5:21 am

4.2 for right now, once the updated version of 5 comes out we will see what better than.

dosghost - August 16, 2012, 5:37 pm

you all should post links to this! thanks

TheRealSlimShady - August 16, 2012, 5:56 pm

i got 5.0 on dark comet but need help doing it i got skype add me my skype username is drewmpark and the name is Drew P

sex13 - February 24, 2013, 9:02 pm

si anybody here can help me???

my darkcomet connect only on my own pc, when i tried to other pc, my darkcomet caannot connect to my client...

bshades - January 2, 2014, 7:51 am

If somebody need help with darkcomet, or blackshades or cybergates set-up?

Contact me skype: c3ll7n

?

sameagle - January 2, 2014, 7:23 pm

i like 5 better than 4.. haven't tried any of the 3s

whyso - January 16, 2014, 8:18 am

Im using 5.3.1 this version works for me better :)

angelsbmr - October 8, 2014, 6:24 pm

hello fluxity,

i have darkcomet version 4 and when i create my servers they work when i run it on my computer but when i spread it , doesnt work and i keep receiving socket error # 11004.

and i really need help , please help me with solution .

my skype is - angelsbmr

anyone can contact me for help and we share ideas too .

thanks
