Thread: [\[EASY\] How to get easy youtube views, subs, comments ECT \[EASY\]](#)

This is my first tutorial so please don't flame =}

Have you been looking for a youtube bot but couldn't find enough accounts?

Well then this website is for you!

You Will Need

A fake Youtube account (*WITH A DISPLAY PICTURE*)

A real youtube account

A Enhance Views .net account

Simply go to <http://www.enhanceviews.net/> (.COM IS A VIRUS)
and make an account.

After you've made that account go to Subscribers and then press Authenticate an account (the fake one you made.) Enter the fake accounts details and press allow access.

Once authenticated. Click "Proceed" at the bottom of the page to automatically start subscribing to other users.

Start to refresh the page until you have your desired amount of sub credits.

After a bit of the page reloading you get a notice saying cooling down, once this appears redirect to Earn Free Credits and click Auto-Comment / Fav / Like Comment, Like, Fav.

Press Click Here To Start and leave this page open (Don't manually reboot this page or-else it won't work.)

When you think you have enough credits to match your subscriber credits (1 sub credit = 10 credits) go to Redeem Credits

Choose how you'd like to spend your credits and you're done! ?

If this tutorial was helpful in any way, shape or form please leave a comment to keep this thread alive :D

Empire views is much better for views. And if you use it in combination with vagex (likes/comments/subs/favs) you can make a bank once you get partnered.
