Thread: [Stronges Crypting Algorithm](#)

xQQ - January 27, 2012, 5:03 am

Cheers,

I'm working on my personal FUD crypter and now I just wan't to know what encryption algorithm is the strongest?

Yui Hirasawa - January 27, 2012, 5:12 am

I'd say MD5.. I doubt I'm correct though.

you can make your own algorithm and if you're good enough with algorithms you can make it the strongest.

But i'd just modify an RC4 Algorithm. Personally, when i want to do encryption (VB6) I use the basic RC4 Module and make it stronger.

someone_ - January 27, 2012, 5:18 am

not sure, but couldnt you just use several encryptions to be on the safe side?
Otherwise i'd google it if i was you (::.

KOREX-3s Military encryption, I use it for my own for like a charm. (if you know how to use it.)

xQQ - January 27, 2012, 5:38 am

Thank you mates. :)
