Thread: [\[free\]Version 4 SQLi vuln\[/free\]](#)

rand0 - January 27, 2012, 8:55 am

I have a SQLi vulnerable website that is running version 4. It's an edu website, so it's kinda nice. If anyone wants it, like for practice, just post below and I'll PM the link to you. This is just so I can know who has the link. I'm curious who has skills :)

?Victory - January 27, 2012, 9:54 am

Wow thats nice ... i am intrested to get the link ^^

Pimp my PC - January 27, 2012, 11:20 am

Can i have the link please , as fast as you can .. maybe ur a cop :D

exploringlyfe - January 28, 2012, 4:57 am

send me buddy i am interested to take that website !

rand0 - January 29, 2012, 11:35 am

Sent to all above. Good luck! I'm curious who's got skills. Enjoy the challenge :)

AnoNimTeck - January 29, 2012, 11:37 am

Can i also get the link please? Thanks in advance ;D

rand0 - January 29, 2012, 11:40 am

Sure, bro. No problemo. I'll PM you the link. It's version 4 though, so good luck! I'll try to find more version 4 vulns to give away soon if I have time.

AnoNimTeck - January 29, 2012, 11:53 am

I tried, but i get an error:

Access denied for user 'acdb2'@'%'.siteprotect.com' to database 'information_schema'
After a bit of research i found out that they just disabled the "SELECT" function to public, and there's actually no way to get access to it D:

stdape2011 - January 29, 2012, 11:55 am

if its 4 you wont get information_schema . otherwise the select might be able to be used if bypass the filter

infamous_blob - January 29, 2012, 1:07 pm

PM me the link, I need blind SQLi practice.

Sure, buddy. no problem. I hope you get the practice you need :)

Also, information_schema is not present, so don't try to inject this like a version 5. This is blind SQLi :)
