Selling it?!? Are you retarded or what?

I can go to your deface page and press "ctrl + s" and I'll have your deface page on my PC within milliseconds.

Lol, nobody would pay for an html page thats up anywhere.

What I'm saying is that it's ridiculous that you make it so people have to download it instead of just viewing the source, whats the point?

so people can edit it and have fun with it :DI really dont understand anything you just said.

german91234 - January 28, 2012, 7:20 pm

im trying to say there is no point of selling a deface page cuz there not worth annything -.- they should all be free lol

Nerv - January 28, 2012, 7:24 pm

That was the obvious point from the beginning.

What I'm still saying is that ANYONE could still get the source no matter what method you used to stop people viewing it, in fact even if you encrypted the source which is ridiculous, people could still get it.

It doesn't make sense why you're treating a deface page like a piece of secure HQ software that you're being nice enough to share with us.

It's ridiculous.

german91234 - January 28, 2012, 7:25 pm

ye, no point encrypting it people will stil get it haha i understand you nerv

VEAxORE - January 28, 2012, 8:54 pm

Good job mate, also you don't need to put the source download link, you can just CRTL + S and

save the page.

german91234 - January 28, 2012, 9:38 pm
xD i know but alwell people can have fun downloading it lol

dubstep - January 29, 2012, 4:58 pm
Why downloading it :/
Ctrl+s gives me it directly instead of using suspicious download links D:

xx 0x0 xx - January 29, 2012, 5:45 pm

Great Prosperity - January 30, 2012, 12:25 am
Very nice, how big is the database?

Natalie Portman - January 30, 2012, 1:36 am
Nice Deface, but you could have done something smart like encrypt it, to keep the skids out... Also its a bit too flashy for me, but I'm sure this appeals to you and some others, so I rate it a 3.5/5

Ol' Dirty Bastard - January 30, 2012, 4:24 am

SIM-659024 - January 30, 2012, 5:36 am

How should i respond to that.
Its a nice thing to share your deface page..
But i think it sucks, let people make their own by the way.

I want to see some creativity.
Put some music on it though.
And get rid of the java abusing part.

At the hack: Nice one bro.

Are you shure yo had to deface them? You could have blackmailed them, good information on ppl. In some cases even paymenth receipts. If you hack a site like that.
First make sure you got the good information.
Then put your page on it and make it look like you did not care. XD

wales2609 - January 30, 2012, 11:47 am
can i just ask why would i download your deface when it says "HACKED BY GERMAN 91234" all over the place? Its nice but if i were to download it i wouldn't mind having the option to change it to my name.

Olli - January 30, 2012, 1:18 pm
Youre German hacker?

1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1

Diabolis - January 30, 2012, 1:29 pm

I personally don't like it. Looks too colorful, its pretty scrambled, you posted your alias literally all over the page, to where it seems as if your trying to show off. Even if its not what your trying to do, the over-extravagance makes it seem that way. A deface should be clean, something that can be looked at and read, without the only message of it being "My name is ____".

But that's only my criticism. Everyone has their own distastes, mine just center around etiquette. Good work on hacking the site, but maybe give the deface a bit more class next time ?

german91234 - January 30, 2012, 8:03 pm

thanks for all comments guys :P haha ye i know it has name all over place but idk nah and im not trying to show off just a deface i liked so i just put it all over place haha got bored so i made it
