Immunity CANVAS - "About Fucking Time"

Ok, so I have had this for a while and it is not the latest version. So I decided to share.

Basically I want to make some cash off this download so I can BUY THE NEW VERSION and LEAK IT!

So, please, just use the shitcash link this time. I never use shitcash links but this time I have to, so I can get the newer one and leak it :P

DOWNLOAD

[Come Get it HERE](#)

Oh, and for the tools who will asking for a virus scan, It is fucking SOURCE CODE. in PYTHON. It is NOT a binary or a .exe.

Though, I could Py2Exe it if someone really wants...

If you don't trust it, read the source.

I did not backdoor it, and it has not done anything evil to my computer or raped my children.

#NOTE#

Please, dont bother providing a direct download. I was generous enough to share, so 5 mins of your time is not too bad, no?

After all, whatever shitcash makes me, goes back to buying more commercial products to leak. kthx

I know it is a really old thread, and for this reason the link you provided is not valid anymore, but if you don't mind I would be willing to purchase this kit from you (latest update you could have).

Sorry for old thread bumping.
