Oh I'll definitely message you next semester, I just bought my books last week and it totaled up to ~\$800, if I would have know I would have come to you.

Yeah they get expensive. I figured I wouldn't get any/many buyers until the next semester starts since most people have already bought their books. When the next semester starts for most colleges, I'll be making a new thread and getting it stickied. But yeah don't forget next semester!

Not sure... Check Amazon and if they sell an ebook version of it, then yes. Otherwise I don't think so. You can give me the name and author of the one and I can check for you if you'd like.

Ahh, they don't sell an ebook version, it's all hard copies. Thanks though!

Haha yeah I'll be paying someone to design a better thread for me and I'll also be getting it stickied. I'm just waiting for the next semester of school to start for most people before I do because that is when most people will need books.

I actually use an iPad for college and prefer having ebooks on it rather than owning the physical book.

Pros:

Easier to read - can zoom in and out if you'd like

Carry all your books on a single tablet (books get heavy)

Ebooks are cheaper - you will save money

You can highlight and de-highlight text in the book

Tablets can do a lot of other stuff too

Cons:

iPads are expensive (but buying books via ebooks will make up the money in savings) - get a kindle fire, nook, other tablet. Or even a netbook if you want to spend less

Good to know man. I'm about to make a new thread with a better layout, hopefully I'll have a sticky for one the next semester starts, and I think I'm going to be doing a great deal for a limited time when the next semester starts... Buy \$300 in books from me and get a free kindle fire. So... since I'm selling books half off, you'd basically be getting \$600 in book and a \$200 kindle fire (so \$800 worth) for only \$300!

Stay tuned.

fads23 - February 19, 2012, 11:54 am

I can get them in .pdf format which iBooks can have. I like using Goodreader better though for pdf's. I can also get them in .mobi which amazon's kindle app can use. But yes it will work in iBooks.
