Alright so for the second week of my reviews I have changed the name and Twisted has provided me with a new banner for eye candy.

This week's anime is Kanamemo. A 13 episode, slice of life comedy, aired back in the summer of 2009.

OVERVIEW

Kanamemo is about a little girl who decides she wants to live on her own. So she runs away and desperately looks for a place of work so

she can afford to live. She then stumbles upon a newspaper service that gladly takes her in and offers her room and board along with the job. She then

goes through the everyday life of working with five other girls that all have a personality way different than the next.

ANIMATION

Animation was quite good and smooth. The only thing that really annoyed me was that the main character's eyes were huge and

just an oval. I don't really like that style for eyes. Otherwise things were nice and smooth and characteristic to what was going on in the anime.

CHARACTERS

All the characters had their own personality unlike any others, and without them this anime would not be nearly as good as it is. Not one of the

personalities are boring in any way. Some may seem dull but they have their own special something that keeps your attention. None of them broke from their personality, such as acting in a different way than normal or trying to gain attention.

RECOMMENDATIONS

So my personal recommendations for this would be K-ON! and Lucky Star. And here is what MyAnimeList recommends: [Here](#)

Thank you for reading through my review and please let me know what you think of the new layout.

Sweet.

I enjoyed both K-ON! and Lucky Star a lot. I'll check this out.

Nice review.

I recommend this anime too. Heck, Rie Kugimiya is even in it so give it a shot.

As for your review, fix up your typos and wording in some areas and it'll be fine. Also consider erasing that random dark spot on the top of your banner.

Twisted is still working on more titles to put in there instead of the bold words.
