Love it, very simple and yet professional. As most know, I love simple designs. I would totally use this for my site <3

The repeating background of place with text is not bad, but when you add image with white background (like chart on left), there is graphic bug. Image with white background isn't clearly place to background cause strips on background. Better is remove it and let white background.

And second thing, light blue strip on the bottom is out of design, delete it.

Anyway, it's not bad design :)
