Thread: [\[TUT\] Create A WebBrowser + Pics \[TUT\]](#)

[**Process.xSs**] - December 28, 2009, 8:33 am

Create Your Own WebBrowser In Vb.Net

What You'll Need :

1 ToolStrip + ToolStrip Controls, 1 WebBrowser.

Now lets begin the tutorial .

First thing , drag a toolstrip from the toolbox onto the form. Make sure that the Grip Visibility is set to Hidden.

[IMG]http://i49.[censored].com/28kukqv.png[/IMG]

Now we will add the controls. You will need:(6 ToolStripButtons, 1 ToolStripLabel, and 1 ToolStripTextBox).

Now we will set the names of the controls.

The first button will be called back, the second forward, the third refresh, the fourth stop, the fifth home and the last GO.

For the GO button set the alignment property to right. Now that you have the names we can set each of the button's DisplayStyle to Image.

Set the proper images for each button.

Now we will name the label and the textbox on the toolstrip.

For the Label set the text property to Code URL and the name to urlLabel.

Now the textbox will be named url and the text leave blank.

Next drag the WebBrowser Control onto the form.

[IMG]http://i50.[censored].com/11c9vti.png[/IMG]

Set the name property of the webbrowser to Code webBrowser

Now for the coding.

Double-Click on the Form and enter this code: Code webBrowser.GoHome().Double-Click on the Back Button and enter this code: Code webBrowser.GoBack().Double-Click on the Forward Button and enter this code: Code webBrowser.GoForward().Double-Click on the Refresh Button and enter this code: Code webBrowser.Refresh().Double-Click on the Stop Button and enter this code: Code webBrowser.Stop().Double-Click on the Home Button and enter this code: Code webBrowser.GoHome().Double-Click on the GO Button and enter this code: webBrowser.Navigate(url.Text).[/code]

Double-Click on the webBrowser and enter this code: Code url.Text = e.Url.ToString().

This is what your final design should look like.

Enjoy and Have fun by adding some more functions ?

The End Gamer - December 28, 2009, 8:36 am

I know how To Do That!!

but Great Tutorial for Beginners

Thanks For Sharing it

[**Process.xSs**] - December 28, 2009, 8:46 am

(Dec 28, 2009 09:36 AM)The End Gamer Wrote: [\[CITE\]](#) but Great Tutorial for Beginners

yeah it's for beginners , people with skill are going to add some more function , background etc ^^ .

Jeff. - December 28, 2009, 10:13 am

This is a great tut for the beginner sad thing is its working on IE so its rllly slow xD i hope microsoft can put ther ego down and add firefox option or something 2.

1luv - December 28, 2009, 2:05 pm

Where can I download Toolstrip + Toolstrip controls?

The End Gamer - December 28, 2009, 2:12 pm

(Dec 28, 2009 03:05 PM)1luv Wrote: [\[CITE\]](#) Where can I download Toolstrip + Toolstrip controls?No Need To Download it

Just Open Toolbox And u'll find it

[**Process.xSs**] - December 29, 2009, 3:52 am

You dont need to download them . They are already on your toolbox .

hemescool - December 29, 2009, 5:16 am

i love the tutorial

thanks mateeeeeee

Montana" - December 30, 2009, 7:22 am

Nice tutorial for beginners like me :P
thanks for sharing

Doubts - December 30, 2009, 3:00 pm

ya i guess... but whats the point of your own web browser?

[**Process.xSs**] - December 30, 2009, 3:02 pm

(Dec 30, 2009 04:00 PM)NoDoubts Wrote: [\[CITE\]](#) ya i guess... but whats the point of your own web browser?

doe someone asked to mozilla why creating firefox ??

1luv - December 31, 2009, 9:30 am

Ah, I see I need to download vb software. Apologies for my noobishness. I would +rep if I could. We need more TuT's like this!

[**Process.xSs**] - December 31, 2009, 6:33 pm

glad you like it ?

Hman - December 31, 2009, 6:35 pm

Nice tut man. Like the layout of it all.

iTrade - December 31, 2009, 6:55 pm

Woah! Very detailed and clear! +rep if I could. ^_^ .

Tetrahedra - December 31, 2009, 7:03 pm

Nice tutorial. But I think I will stick to my Mozilla Firefox Browser.

[**Process.xSs**] - January 1, 2010, 3:22 am

thanks for all your feedbacks ?

Tazac - January 4, 2010, 10:12 am

I have a problem when I add some buttons on and i want to set like STOP it says Property value is not valid :S what do i do?

EDIT : 100 POST YAY!

Suzquaz - February 22, 2010, 1:52 am

Hey ive been serching around for tutorials like this but i still can't find how i can endable JavaScript on my browser cuz i want to download the flash player...

Mr Kewl - March 19, 2010, 3:57 am

Gr8 i will sure make 1
Browser b-)

hacker300 - March 19, 2010, 7:09 am

Double-Click on the GO Button and enter this code: `webBrowser.Navigate(url.Text).[/code]`
Double-Click on the webBrowser and enter this code:
Code:

`url.Text = e.Url.ToString()`. for the url.text it gives me a error. WhY?

DeadlyVermilion - March 19, 2010, 11:48 am

This is a great tutorial. Especially for some beginners, I am glad there are people like you on this forum.

P.S I already know how to code..

Aw Ma Gawd - March 26, 2010, 7:09 pm

mhmmm nice code but where do i get the buttons for everything? thanks :) nice tut aswell.

shaddy@123 - March 26, 2010, 9:05 pm

Awesome TUT. Helped a beginner like me.

Thanks alot mate.

Will start making one as soon as I'm done with an ANTI-KAV

protocol™ - March 26, 2010, 9:34 pm

very good tut mate,he deserves many some reps.guys +rep him

Aero - March 29, 2010, 10:38 pm

I get an error message when I try to debug it.

But when I go to my project folder and find the application it works fine.

shaddy@123 - March 30, 2010, 5:08 am

Can you also tell us how to add more options like:

- 1) A History Sidebar
 - 2) Saved Passwords section
- etc. etc.

codepoet - May 5, 2010, 7:44 pm

very nice tutorial ...thanks

Anx?ety - May 5, 2010, 8:46 pm

Most Noob Freindly tut on HF 5/5 Good Job Bro. Keep the Nice tuts up

Kotei - May 5, 2010, 10:19 pm

Ewww D: It uses web browser....

KillYou! - May 5, 2010, 10:48 pm

Most peoples of here know that, but this will help to begginers.

Thanks Verry Much :)

wizepanda - September 22, 2012, 9:49 pm

Thank you now it's time to add some functions!

Percocet - September 22, 2012, 9:52 pm

There's really to many of these tutorials here already...

(May 5, 2010 10:19 PM)Xypher Wrote: [\[CITE\]](#) Ewwwww D: It uses web browser....
Are you retarded? How else would you make a "webbrowser".

xXxBrendanxXx - October 13, 2012, 2:53 am

With a statement like that, your the only retard.

@OP, lock the thread please.

?TN© - October 13, 2012, 3:28 am

There are tons of these tuts and they are really easy to make. Good job I guess.

Dark_Noodles - October 13, 2012, 7:27 am

You grave dug this too ???

You made yourself looked like an idiot.

Phantom2 - May 16, 2013, 3:53 am

Thank You !

a great tutorial for beginners

Jordy - May 16, 2013, 3:54 am

A web browser is the first thing i made with Visual Basic, Great for learning the language. Good tutorial!

Cornflower Blue ???-?— - May 16, 2013, 7:48 am
