Why can't you just post it here instead of asking everyone to pm you/post here and waste server resources.... It's probably a very popular method too. Either fucking release something or don't release it. Stop blatantly trying to get rep by asking people to pm you for it.

Anyway, i wanna see how the 5 step method works, so pm me aswell.

DO NOT PM HIM !

DO NOT DOWNLOAD FROM HIS LINKS !

Someone needs to neg rep this scamming little fuck.

Fuck me this thread really is annoying me now.

Just look at all the posts by all the gobshites who can't look to the top of this forum. There it is in plain sight everything you need to know about wep and wpa.

"please send me your amazing easy 5 step process" - GO FUCK YOURSELF cubuss you self inflated egotistical little shit go shove your cash for click links up your arse.

There are a thousand threads on here explaining it in great detail, we do not need this one.

/Rant

I have requested this post be removed entirely, it adds no value to the wifi section of the forum.

I know it seems out of the way to find a post like this but at least look in the thread to see if people said this works and you should have seen that post.

Finally got the key... But as i expected this dose not work... (-8 rep)

Tells you its not wpa2 when my app dose and i got for wep and give me this bs "0135714245" for a "pass code" , even windows is smart even to tell me its the code on the back of the router that is needed... not some random numbers

giving it a 2nd chance with a different network

Edit: yup this program is complete bs

You are still gay as a 3 dollar bill. Your method sucks ass and you suck all noobs into banner clicking. This is why you have a negative rep. loser

I wish it could be deleted.

I agree even more. If they can't follow Magnus's tutorial or search Google, then they should stay away from both HackForums and BackTrack.

Even though I am a new user, I get a little embarrassed when I see threads like these "help hacking wifi" and similar.

This thread is absolutely pointless,

Whatever your tool does, is probably near enough the same as Gerix WiFi cracker.

I bet it doesn't have the same functions either.

Why not just tell the people in this thread to use Gerix?

It would be so much easier.

There is not "Secret" hax for WEP/WPA, it's the same thing re-hashed.

Using the Aircrack-ng suite.
