Hey Python Fellows ,,,

Well, I announced before about my offer for help in python [[HERE](#)], and I got so far 12 persons who want help in/learn python and I accepted being their teacher/mentor ... and after I discussed the situation with the guys (I like Democracy ?) , we found that making tutorials here in our lovely forum HF is the best way to teach them python as I can't get them all in one time, Plus I find I can share my knowledge either with other python fans here, and if anyone find something complicated or has a problem in python, contact me via Skype/ Facebook/ Yahoo (Check my Signature ?) ?.

Soon, I'll publish the first Episode in my Series for Learning Python from Scratch ... and I really hope it satisfies you guys .. and find it useful and handy.

? So, Stay Tuned ?

If you want any help, say write up a section of it for you, just ask me :D (would love to write a tut on list comprehension :P)

Why not just write a tutorial on list comprehension?

I really don't see why you need someone elses "support" on this.

Dmaster_773 - February 3, 2012, 3:12 am

Meh, a more complete tutorial covering more aspects would be better in my opinion...

Hydra_ - February 4, 2012, 10:42 am
