Thread: [Accepting Requests](#)

Spedunkle - December 28, 2009, 2:22 pm

I have been using Photoshop, IN-Design etc... for about 10 years now, and I am STILL learning new shit. I find that I find new techniques that suit me best by actually making something for a reason.

I am accepting signature, logo etc... requests. So request away, please request on this thread. The first three requests will be done, and the rest have high hopes, with no guarantees being that I am a working man.

Thanks,

J. Powers

p.s. Please grant a 48 hour delay, real life sometimes does that.

Returnity - December 28, 2009, 2:34 pm

Erm, how about a Kevin nolan sig? In a newcastle strip, with the badge like faded into the background and abit of effects.

ArmyyStrongg - December 28, 2009, 2:38 pm

Spedunkle - December 28, 2009, 4:11 pm

Please note that the 'Armyystrongg' name is transparent and will take up the background of the area behind it.

Spedunkle - December 28, 2009, 8:04 pm

Returnity, here are some fast samples I made while at work. Tell me if you like the general feel and I will pump out some more.

[img]http://i885.photobucket.com/albums/ac57/JPows/Returnity1copy.jpg[/img]

Please note that I don't feel right using the photo of the logo, so if you want, I can re-make it with

the same layout.

Mister Sinister - December 28, 2009, 8:08 pm

Hallow, here is the starting of yours. Not finished yet. Just letting you all see the progress. As you might guess, the hexing and binaries spell out Hallow.

I can make you many, what are you looking for as far as style?

ArmyyStrongg - December 28, 2009, 10:54 pm

anyway you can make soem diffrent ones i like them but how about doing like a CSS or WoW or even a mario one that would be badass

Spedunkle - December 28, 2009, 10:55 pm

Sure Armyystrongg, I can mix those in.

..Novalok.. - December 28, 2009, 10:58 pm

Jpow, could you do me one up... I want it to be on of those that have transparent background through it you know what i mean like kinda looks 3d bc it pops out....

My only requirements: I want it to be a Minnesota Vikings Themed logo, adrian Peterson ect. and it needs to have Novalok on it somewhere..

Spedunkle - December 28, 2009, 11:01 pm

Sure Novalok, not sure when I can pop it out, but don't expect it to take too long.

I could even make you a little 3D football team?

..Novalok.. - December 28, 2009, 11:03 pm

it dont have to necessarily be a pop out one, hell tell u what.. your completely open with options

Bad Meets Evil - December 28, 2009, 11:04 pm

I know you are really busy, but if you could make a Nistr sig with a dark theme to it with cool effects, I will be happy.

Spedunkle - December 28, 2009, 11:09 pm

Sure nistr, expect it within 78 hours. If real life gets me, little longer.

ArmyyStrongg - December 28, 2009, 11:10 pm

jpown can you PM me when your done so i know when to come check back in?

Sure Joser, I can come up with something simple and effective. To be honest, I didn't like the outcome of a few of them. To make myself sleep at night I remind myself that everyone has different tastes :-)

Expect it within 3 days, give or take, I might make it now since you don't seem to want anything that involves cutting out little football men from photos I have to get permission to use.

I dont know if there is a way to make this look like a stencil or something? Some type of photoshop detail editor. Maybe just taking the first one and adding some trim detail in white and some sort of skuzzlebutt lettering at the bottom depending on your artistic interpretation, maybe a mix of the 2?

And if you would be so kind, something easy.

Mr. Pixel, here are some concept ideas, or usable ones, you decide. They are big and what not so you can re-size them without trouble.

Jees photoshop cs3 really blows when your making long complicated GIFs...time to get an animator! Anyway, this took me like an hour, that includes learning how to use the damned thing. Progress is such.

You can go wild on my sig since I'm pretty indecisive . I'll tell you something then change the next minute.

I'd like it to be different then the average sig , something that'll make people remember me from post to post by it.

I don't want it like my current sig much but you can use the fluro bright splatter effects to if you'd like :) And i'd like my name to look sick to. If possible and not to much effort id like it to integrate with the background if you know what i mean. Like not just a rectangle so much.

Thanks a tonne nigs.

Prozaca - January 1, 2010, 1:18 am

It looks neat as fuck :D And original with the animated letters but I think in Need something more colorful and fluro-e and stuff But i like your idea a lot. If im being to much of a bother dont worry about it :) But if you get the time whenever your bored id love it if you'd try a few different ways. Maybe even practice your giffing skills to?
