It's okay.

But you misspelled Vulnerable. At the bottom in you program.
Other than that, it's pretty nice.

idb. - June 8, 2014, 8:41 am

Why are people ing a 2 year old thread? Anyone? Anyone?

zyvox - June 8, 2014, 3:25 pm

^My guess is that an user got bashed on for not using the search button for something, then he did, and now people are complaining that he actually used the search button and found a thread instead of posting a new one.

Fucking people on this forum. Either they yell on a guy for not searching, or else they yell on him for necroing threads.

Then again he might just have done it himself. I just stated my opinion anyway. Why am I even bye

Azfull - August 14, 2014, 6:07 am

That is awesome! You could definitely improve on the GUI though.

Cisteriaso - August 14, 2014, 7:36 am
