Thread: [Anti-Leak \(Using Online DB and HWID\) \[TuT\] \[Source\] \[VB.NET\]](#)

Vorfin - December 30, 2009, 3:08 pm

Anti-Leak (Using Online DB and HWID) [TuT] [Source] [VB.NET]

Download the source here: <http://www.ripgway.com/?d=LPGS41H7>

Go to <http://www.ripgway.com> and sign up for an account.

Build/Run the HWID file.

Open "Database.txt", edit in your HWID as I have specified inside.

Put the source from "Online HWID Database" Into your program.

Upload "Database.txt" to your Spam account.

Edit your program/"Online HWID Database" Source accordingly.

When selling your program, include HWID.exe in the link, and have them PM/e-mail you their HWID before using the program, so you may add it to your database.

To stop a copy from working, remove the HWID from your database.

Questions:

Q. What if they are not in my DB?

A. Then the program wont open/run.

Q. What is a HWID?

A. The ID of your computer, everyone has a unique one.

Q. What does HWID stand for?

A. HardWare IDentification.

Q. The code doesn't work!

A. You need to add the management reference. (Project - Add Reference - .NET - System.Management)

Voluxe - December 30, 2009, 3:17 pm

Nice vorfin.

I needed this :L

PwNaGe™ - December 30, 2009, 3:40 pm

thanks :)

will use and give proper credits

SIM-82498 - December 30, 2009, 3:43 pm

Thanks a lot for this Vorfin. Used it, and working great.

iRtehLeet™ - December 30, 2009, 5:03 pm

This has been on vbsources for quite awhile guys, you should really register. ?

newbie223 - December 30, 2009, 5:22 pm

nice share vorfin :)

p00pin - December 31, 2009, 5:35 am

Hey, idk if its me, or what, but i did it, and it works like a charm but theres a problem. You see, its really secure and all, but when the computer has no internet connection, it comes up with an error, on which u can press continue to get to the program. How am i supposed to handle this error in vb?

Thanks

P00pin

JammyJ - December 31, 2009, 5:41 am

thanks alot, i needed

Sikandar - December 31, 2009, 5:52 am

(Dec 31, 2009 06:35 AM)p00pin Wrote: [\[CITE\]](#) Hey, idk if its me, or what, but i did it, and it works like a charm but theres a problem. P00pin

make the program check the internet connection and when it has an error on connecting....exit sub

p00pin - December 31, 2009, 5:55 am

(Dec 31, 2009 06:52 AM)sikandarnandwani Wrote: [\[CITE\]](#) make the program check the internet connection and when it has an error on connecting....exit subThats exactly what i want, but idk how to do it :(.

Mongoose - December 31, 2009, 5:55 am

Hey can we add this with PDF files for securing the method etc

The End Gamer - December 31, 2009, 6:15 am

Great Share Vorfin

Thanks a lot Dude =)

p00pin - December 31, 2009, 7:45 am

Does anyone know how to kill the program when any errors occur? (by any i mean any, for example no internet connection, file not found, Spam down etc.)

Thanks

P00pin

drkshotz - December 31, 2009, 7:55 am

nice share (message is to short)

The_KGB - December 31, 2009, 10:26 am

Thanks a lot! this is extremely useful.

Foul - December 31, 2009, 11:37 am

A couple minutes in OllyDbg would render this useless, but nice guide anyway.

iRtehLeet™ - December 31, 2009, 1:14 pm

(Dec 31, 2009 12:37 PM)JeEzZ Wrote: [\[CITE\]](#) A couple minutes in OllyDbg would render this useless, but nice guide anyway.

Obfuscation is the key to success. ?

Also, adding a couple more small checks like I did works too.

Grey Hat Hacker - December 31, 2009, 2:09 pm

(Dec 31, 2009 02:14 PM)iRtehLeet Wrote: [\[CITE\]](#) Obfuscation is the key to success. ?

Also, adding a couple more small checks like I did works too.nosir, you can use other stuff to bypass the check other than obfuscating keys.

iRtehLeet™ - December 31, 2009, 2:10 pm

(Dec 31, 2009 03:09 PM)Grey Hat Hacker Wrote: [\[CITE\]](#) nosir, you can use other stuff to bypass the check other than obfuscating keys.

What? If you obfuscate your final .exe that performs the check there is no chance someone can OllyDbg it. (I think you understood my post wrong ?)

Grey Hat Hacker - December 31, 2009, 3:29 pm

You can still decrypt stuff like UPX and Themida.

.NET Reactor is extremely easy.

Sparky - January 2, 2010, 1:46 pm

Where in the source do we paste it?

iDecrypt - January 2, 2010, 4:52 pm

Thats very nice thanks vorfin :P

SIM-82498 - January 2, 2010, 10:19 pm

(Jan 2, 2010 02:46 PM)Sparky Wrote: [\[CITE\]](#) Where in the source do we paste it?
Form1_Load, cause you want it to check before the form loads.

bangaz - January 26, 2010, 12:23 pm

man..i love all your work !!:P Awesome and thnx

keep it up mate

NaughtyNecrophilia - January 26, 2010, 9:48 pm

Thanks for the share, good stuff!

who the fuck is alice - January 26, 2010, 9:53 pm

thanks vorfin !!! love ya

Black Shadow - January 26, 2010, 9:59 pm

Just what i needed thank you!

KingCobraXD - January 30, 2010, 3:21 am

perfect.....

GREENEXXX - January 30, 2010, 11:58 am

SEXY POST!.....it works

StormX - January 30, 2010, 3:00 pm

thanks. 2shortzzzzzzzzzzzzzzzzzz

Ex-Coder - February 7, 2010, 4:11 am

I got one exploit :

If the person block firewall and make no connection from the program. The debugger will appeared and if the person click continue. The program will show as normal. Any ideas ?

Vorfin - February 7, 2010, 4:36 am

(Feb 7, 2010 05:11 AM)hellxox Wrote: [\[CITE\]](#) I got one exploit :

If the person block firewall and make no connection from the program. The debugger will appeared and if the person click continue. The program will show as normal. Any ideas ?

Put in a try and catch on their internet connection, ending the program if it can't connect.

Odayleet - February 7, 2010, 6:24 am

Thank you :)

Ex-Coder - February 7, 2010, 7:02 am

(Feb 7, 2010 05:36 AM)Vorfin Wrote: [\[CITE\]](#) Put in a try and catch on their internet connection, ending the program if it can't connect.Thanks for it !

(Dec 31, 2009 06:55 AM)p00pin Wrote: [\[CITE\]](#) Thats exactly what i want, but idk how to do it :(.
after the error statement add Code me.close()

Vincenzo? - February 14, 2010, 3:45 pm

i dont know exactly where to put the source in my program i really need help with this ?

Joey K - February 14, 2010, 5:46 pm

Thanks for this Vorfin.

Da Loser - February 14, 2010, 5:51 pm

What if they use the host file to root the site the app connects to localhost and host their own database?

TkT Monster - February 14, 2010, 6:01 pm

This is very simple and easy to follow. If you wanted to make the program even more secure, you could encrypt the strings.

Valzidox - February 14, 2010, 8:15 pm

I get a .NET error...? Unable to connect to remote server? I checked the Spam link, it's fine. O_O

Any help...?

iRtehLeet™ - February 14, 2010, 9:19 pm

(Feb 14, 2010 06:51 PM)Unicode Wrote: [\[CITE\]](#) What if they use the host file to root the site the app connects to localhost and host their own database?

Read and check the hosts file for any sign of your website/website IP.

protocol - February 15, 2010, 2:10 am

damn i was looking for this only,very very good tut,thx a million vorfin

TheBlackMarket - February 15, 2010, 8:51 am

Thanks for sharing this with us Vorfin! =) awesome...

Promugg - March 6, 2010, 10:30 pm

I FAIL AT SETTING THIS UP IF ANY1 CAN HELP MEH WITHIN A FEW MINUTES I WILL PAY PM ME

Su?ernatural - March 6, 2010, 10:43 pm

I get 4 errors when I add it to my Builder

Error 1 Type 'ManagementClass' is not defined.

Error 2 Type 'ManagementObjectCollection' is not defined.

Error 3 Type 'ManagementObject' is not defined.

Error 4 Type 'WebClient' is not defined.

Joler1302 - March 7, 2010, 2:45 am

(Mar 6, 2010 11:43 PM)iSoftware Wrote: [\[CITE\]](#) I get 4 errors when I add it to my Builder

Error 1 Type 'ManagementClass' is not defined.

Error 2 Type 'ManagementObjectCollection' is not defined.

Error 3 Type 'ManagementObject' is not defined.

Error 4 Type 'WebClient' is not defined.

If you cant figure those out ill help ya^^

Code Error 1 Type 'ManagementClass' is not defined.

Error 2 Type 'ManagementObjectCollection' is not defined.

Error 3 Type 'ManagementObject' is not defined.

Goto add refrence and find the Management class^^

Code Error 4 Type 'WebClient' is not defined.

soloution:

in top of code add:

Code Imports System.Net

Optiikzz1 - March 7, 2010, 5:44 am

very Nice TUT.....

(Too Short)

fads23 - March 7, 2010, 6:21 am

This is a nice method, but network traffic debugging would render this useless, even if it was obfuscated and un-decryptable.

DarkOne1 - March 7, 2010, 9:25 am

Very useful. I guess one way around it would be to somehow decompile the program and change it so it checks a database you uploaded instead.

DvS - March 7, 2010, 1:20 pm

Sorry if im a noob, but how would i add this to a vb/vb08 program i make
Sorry if im a noob, but how would i add this to a vb/vb08 program i make

Kotei - March 7, 2010, 11:00 pm

(Mar 7, 2010 03:45 AM)joler1302 Wrote: [\[CITE\]](#) Code Error 1 Type 'ManagementClass' is not defined.

Error 2 Type 'ManagementObjectCollection' is not defined.

Error 3 Type 'ManagementObject' is not defined.

Goto add refrence and find the Management class^^

How exactly do you do that...I get these same errors...

Cooldude™ - March 11, 2010, 12:04 pm

Nice tutorial. I will definitely use this method for my future applications. Thanks for the share :-)

Su?ernatural - March 11, 2010, 2:31 pm

(Mar 8, 2010 12:00 AM)genocide4fun Wrote: [\[CITE\]](#) How exactly do you do that...I get these same errors...

Add the Management Class Reference
and then the .net import.

Tate - March 11, 2010, 2:49 pm

I will definitely use this. I will probably make it download and run the program, then delete it when it's closed :)

In The Clutch - March 12, 2010, 5:56 am

niceee been looking for this thanks

vitrix - March 21, 2010, 11:24 am

nice source cod good worl =)

[iSphynx] - March 22, 2010, 5:19 am

Very good coding, i got no errors at all implementing it, i thought i would, but my question is can you change your Hardware ID?

proisr - March 22, 2010, 7:42 am

How can I make it more professional and make it read from a real DB?

I mean it will read from SQL tables or something like this...

Cause I already built a tracking system based on this technique

Kink - March 22, 2010, 11:47 am

this is easily crackable,

1. open the exe in hex editor
2. search for the URL it connects to
4. change the url to you're site's TXT URL
5. Add you're database ID to you're site's TXT file.

InvisibleMan- - March 31, 2010, 9:13 am

Thanks for the tutorial, I will definitely be using this.

King Kong - April 2, 2010, 3:25 pm

nice tutorial!!!!!!!!!!!! i will be using this

Breakbeat Junkie - April 2, 2010, 5:28 pm

Thanks for this share :)

Oeno - April 5, 2010, 8:47 am

do you have this for C++ pls send me a pm

Vincenzo? - April 6, 2010, 4:35 am

whats another site i could use just like Spam.com every time i make a account upload my database my account gets suspended :-S

Bl?ze - April 6, 2010, 4:45 am

Nice tut, I might use this.

Cragga x - April 6, 2010, 12:53 pm

there's a mistake:

Go to <http://www.Spam.com> and sign up for an account.

Panagiota - April 6, 2010, 3:06 pm

(Apr 6, 2010 12:53 PM)Cragga x Wrote: [\[CITE\]](#) there's a mistake:

Go to <http://www.Spam.com> and sign up for an account.

It is obvious mate,

he says for the rip\$way . com (without the \$)

But you can do the same with any other ftp server.

0xE9 - April 6, 2010, 3:27 pm

add this before on form load

what this does is it checks for internet for the program

Code if my.network.isavailable = true then 'This checks if the network is available

'HWID Code here! if you net work is available it does this<

Else 'if my.network.isavailable = FALSE Then it does...

msgbox("Network Not Available ,Please Reconnect then Try Again.") 'Makes a message box to inform you on the error

me.close() 'this which closes the form1.

end if

Dz5 d3m0n - April 6, 2010, 7:47 pm

Thanks bro, helped me out bigtime.

skiiiz - April 6, 2010, 8:45 pm

How do you find out the HWID of a computer?

Dz5 d3m0n - April 6, 2010, 9:31 pm

(Apr 6, 2010 08:45 PM)skiiiz Wrote: [\[CITE\]](#) How do you find out the HWID of a computer?

You use the HWID Checker,

Not the online one.

C10Wn - April 16, 2010, 2:12 pm

Um more indetail what are we are we supposed to do on our source

Zak - April 16, 2010, 2:49 pm

Great tutorial man! This is an epic share.

Cache - April 22, 2010, 12:38 pm

The file you are trying to access is temporarily unavailable.

:(

Meth - April 22, 2010, 1:52 pm

Yeah the megaupload link isnt working :/ It starts downloading then fails

If you could upload it somewhere else that would be awesome I could really use this.

snwspeckle - April 22, 2010, 8:00 pm

I can't DL the file. My time limit has exceeded... wtf

Thanks a lot but anyway you can make it so that you click a button to check instead of an automatic check? Also si there anyway so that after it confirms it once, it does not need to confirm it again?

dayayarealatino - April 27, 2010, 2:06 pm

this produces the same hwid on different computers all the time

Scrat - April 27, 2010, 2:11 pm

Thanks mate I like this tutorial it's great!

WhizKidz - June 29, 2010, 7:28 am

Thank's God that you have exist vorfin you are great.

and maybe i will learn encryption thanks vorfin you will be added in first in credits
thank you i love it much!

alex_androunet - July 5, 2010, 9:50 am

Thanks, i used this, i will give you credit ofc

Black Hound - July 17, 2010, 8:51 pm

This is amazing, however my file is being quite stupid as I cannot remove the error on line: Code Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles MyBase.LoadHas multiple definitions with identical signatures.

Please go easy I am new.

GREENEXXX - July 17, 2010, 10:26 pm

Dose anyone know how to block the exploit where u turn off ur internet u bypass?

GAMEKINGZ - July 17, 2010, 10:29 pm

Really nice share man i was looking for this one.

Irion - July 19, 2010, 12:22 pm

Thanks for the share, but I can't add it succesfully to my project ...

Irion - July 19, 2010, 1:36 pm

Sorry for failing where the others succeeded. But I can't insert the HWID to my project .. I don't know how to do this .. So sorry about my noobness :(

Oxycotton - July 19, 2010, 8:07 pm

Wow... this is fucking sexy :D

versx - July 20, 2010, 1:22 pm

Great tutorial I will be using this soon!

BTW what is the website that turned into "spam.com" that you are referring to in the beginning? PM me it please, and thank you.

GI?ryallowed - July 20, 2010, 3:57 pm

Nice share vorfin :D, but I want to tell you that rip way is filtered and changed to the word spam on HF.

SRH - August 17, 2010, 8:31 pm

(Apr 6, 2010 03:27 PM)DeadLine Wrote: [\[CITE\]](#) add this before on form load

what this dpes is it checks for internet for the program

Code if [b]my.network.isavailable[/b] = true then 'This checks if the network is available

Else 'if my.network.isavailable = FALSE Then it does...

msgbox("Network Not Available ,Please Reconnect then Try Again.") 'Makes a message box to inform you on the erro

me.close() 'this whhich closes the form1.

end if

i get a error on this..

"network" is not a member of My

any help

MaxiMiao80s - August 26, 2010, 2:34 pm

Hi.

Thanks for this stuff.

But i have a question: How i can upload a file on spam.com?

Milopeach - September 16, 2010, 10:19 pm

Thanks Vorfin, Using it now! Another awesome tutorial.

quick05 - September 19, 2010, 12:53 am

thanks man it works for me =)

B?ast - September 19, 2010, 4:14 am

i get an error when i try to use it:(

yantoy - September 19, 2010, 9:13 am

you dont know to use it :(

Galaxy Wave - September 19, 2010, 9:28 am

Thanks for the share!

uvjuyvjuyguygjjgjuygju

Ainsley - September 19, 2010, 9:30 am

Some HWID's Are the same tho.. its best to use GUID also known as UUID or UID

Automatic Coding - September 19, 2010, 11:12 am

(Sep 19, 2010 09:30 AM)Ainsley Wrote: [\[CITE\]](#) Some HWID's Are the same tho.. its best to use GUID also known as UUID or UID

hwid = hardwareID

GUID=??ID

UUID=??ID

UID=?ID

RTMA Whitehat - September 28, 2010, 6:13 pm

[IMG]http://i51.[censored].com/23siys1.jpg[/IMG]

I get this error, Yes I imported System.Management and added to references.

Any ideas?

yojod - September 28, 2010, 6:18 pm

Thanks for this...was wondering how to do it:D

RTMA Whitehat - September 28, 2010, 9:00 pm

Could someone please inform me how to fix this 1 error?

[IMG]http://i51.[censored].com/23siys1.jpg[/IMG]

I did import system.management

Pulser - September 29, 2010, 9:25 am

(Sep 28, 2010 09:00 PM)RTMA Whitehat Wrote: [\[CITE\]](#) Could someone please inform me how to fix this 1 error?

[IMG]http://i51.[censored].com/23siys1.jpg[/IMG]

I did import system.management

Try going to Add--> Reference --> System.Management

xCocaine - October 1, 2010, 8:07 am

Vorfin, run your protected software on sandboxie. LOL.

Ook - October 1, 2010, 10:54 am

Thanks a lot will be using this. Should come in handy if I ever decide to get around to it.

South Park - October 1, 2010, 10:56 am

This is extremely easy to crack, but its still a great example of what a HWID system should be like.

ReAL HoMeR - October 1, 2010, 11:46 am

Very nice. I didn't even know this was possible in VB.NET ?

xCocaine - October 1, 2010, 11:49 am

The problem is if you run the file sandboxed the protection will be null :S

.bLaZeD - October 5, 2010, 7:15 pm

(Dec 31, 2009 06:55 AM)p00pin Wrote: [\[CITE\]](#) Thats exactly what i want, but idk how to do it :(I think

this is what you're looking for. Add this right before the last 'End Sub' in the online HWID Database
Code On Error Resume Next
Me.Close()
There ya go!

D??i????™ - October 5, 2010, 7:42 pm

Great tutorial, does it check to see if the user is connected to the internet?

dezpair - October 14, 2010, 8:20 pm

i cant DL the file~ (im noob)..

EDIT: i already DLed~

oh thanks a lot

oh.. some computers have the same MotherBoard have the same HWID too.. that's weird..

Scrat - October 14, 2010, 11:30 pm

Great tut lol. Keep it up mate.

SIM-209986 - October 14, 2010, 11:54 pm

I do not recommend to use this Protection on your Applications. This can be bypassed with Fiddler, simply set its Rules to make an automatic breakpoint after Responses, then Simply edit the file in the textview and place your HWID there. Done.

Watever, if someone wants me to make a login system for him with Network encryption and shit, PM me.

Hornstar - January 6, 2011, 4:53 pm

(Oct 14, 2010 11:54 PM)MaXim Wrote: [CITE](#) I do not recommend to use this Protection on your Applications. This can be bypassed with Fiddler, simply set its Rules to make an automatic breakpoint after Responses, then Simply edit the file in the textview and place your HWID there. Done.

Watever, if someone wants me to make a login system for him with Network encryption and shit, PM me.

It would be great to have something like that and where it works with a mysql database instead of the text file.

GAMEKINGZ - February 16, 2011, 10:49 am

I will keep this topic in my mind , this comes in handy for later :D Thanks.

QuetzalcoatlI - February 28, 2011, 4:20 pm

Tnx man a lot for this... You are great... :)))

wayneee - March 3, 2011, 9:03 am

OMG thats what i was searching evreywhere Thanks alooooot man :D

TheDubWubCub - March 3, 2011, 8:53 pm

OMG THANK YOU SO MUCH! i added some other things to my build to make it more secure but yea thanks alot! <3

.NET Coder - March 3, 2011, 11:16 pm

Very good. and dumb people wont understand this :D.
Great system. Noob proof.

?Kreedz?™ - March 4, 2011, 12:00 am

Great tut this works like a charm

ShadowHelper - March 22, 2011, 9:30 pm

Problem with this is if the website is down OR they block the website OR they have no internet the app still opens..

Doctor07 - March 23, 2011, 1:16 am

Not the best way i must say, but very helpful for thoes new programmers to progress from, nice post there Vorf.

PixXxaS - February 28, 2012, 9:03 am

How is the download link? i will Download it.

idonotcare - February 28, 2012, 9:31 am

(Feb 28, 2012 10:03 AM)PixXxaS Wrote: [\[CITE\]](#) How is the download link? i will Download it.
i think it was hosted on mega--upload com so you will have to ask the guy if he reuploads it

VPN - February 28, 2012, 1:06 pm

Come on guys .. this thread is from 2009 so I don't think that you will need this anymore.
There is much more tutorials around here about the same idea,just use the search button.
