Thread: [Cybergate, BlackShade, Darkcomet 5 Settings for All Crypters](#)

Unkn0wn X - February 7, 2012, 2:11 pm

Hello All ?

This is my first thread On HF and i am Sharing Rat setting for the most Widely used rates. This settings of rats are 100% Working with all Crypters. So now there is no need to ask for Rat settings on any Crypter thread. Hop you all like it and sorry for my bad english I am German.

limonades - February 8, 2013, 11:08 am

Can i have the settings for cybergate 5.3.1 for 2012 crypter? i can crypt it , it works on win 7 but never on xp.

I am also not new on crypters, what ever i tried 2012 crypter doesnt work for me on xp...

Please help :)

Thanks in advance

Update :

I have 2012 crypter , i send several pm's to owner , no reply . It doesnt work on XP for darkcomet 5.3.1 or spynet 2.6. Finally i send him a link with my rat to crypt and i got no replies anymore. I dont care if i got banned or what ever. Does it work for you guys? cuz his reply was use stub 2.... tried really everything doesnt work.

Kind regards,

Z

Mate what good is this if the links are down , there could be no progression in the learning stage if the links are down, Please update.

oandy1 - February 24, 2013, 4:01 pm

hey i have a question:
what is the beast RAT u think?

hamwq - February 25, 2013, 4:50 pm

The links are down, Please update. Its saying too much traffic!!

sonictype - February 26, 2013, 2:40 am

Thank advanced man

nullend_void - February 26, 2013, 7:05 am

For Dark Comet in general all settings have to be disabled except the keylogger on by default. Also make sure you don't use UPX when creating the server. The settings uploaded are for the old version but shouldn't be so different from version 5. I can upload photos if someone needs it.

booter93 - February 26, 2013, 9:20 am
