Thread: [i need help setting up a shell booter exe or web i will pay if u help me](#)

MAK3R - February 7, 2012, 10:13 pm

i need help i have never made a booter before and im new 2 hacking i want a booter 4 personal use so message me if u know how to make one

CuisinartBlade - April 20, 2017, 12:58 pm

Here, i found a decent one, and its easy to use.

(I can't post links, so go to mediafire.com and in the url bar paste /file/pbe1debx2hd8qg7/JeeJee+Power+1.0+Stresser+Source.zip)

You'll need to compile the source, but im sure it's worth it :)

If you want to learn how to make one, i really cant help you there. But I would recommend looking at the code and learning how it works, kinda like how they teach you new languages (verbal, not computing).

Hope it helps! :)

This thread is from 2012 and OP is closed what are you doing

CuisinartBlade - April 20, 2017, 1:00 pm

._.

Im sorry lol i'll read the timestamp next time
