Thread: [Sig Size error](#)

Cody8295 - February 8, 2012, 8:00 pm

Parse error: syntax error, unexpected T_STRING in
/home/hfaccount/domains/hackforums.net/public_html/inc/plugins/sigimagesize.php on line 107

And yea, I saw the Twitter update, just reporting in.

Pir4T - February 8, 2012, 8:00 pm

Created a Sig Image Size Check plugin so that images over 650x200 return an error.

@HackForumsNet

Zinthertar - February 8, 2012, 8:03 pm

At least this thread will help clueless members who thought the forum was DDoSed

Yes i know, tons of threads are coming just for an simple error.

Douchebag # 145 - February 8, 2012, 8:06 pm

I am sorry for the two users who didn't read the thread.
Were you trying to upload a signature smaller than 650x200?

(° ? °) - February 8, 2012, 8:07 pm

I'm not using an image for my sig, yet I get the same error ?

Zinthertar - February 8, 2012, 8:08 pm

You're the one who didn't read the thread. There was an error and he is referring to Omni's tweet.

EVERYBODY got the error because he was updating the plugin.

Well as far as i know. Regular members can't use images in their signatures.

"And yea, I saw the Twitter update, just reporting in."

Two people linked him to the Twitter for no reason, he had all ready read it. I'm assuming that OP tried to upload a signature smaller than 650x200 and got the error he posted above. Or am I way off?

(Feb 8, 2012 09:09 PM)Guess Who Is Back Wrote: [\[CITE\]](#) Well as far as i know. Regular members can't use images in their signatures.

He said he is not using an image in his signature.

He said he is not using an image in his signature.

No it was an error that appeared for everybody. That is why the syntax error went off. If you read the "HF Down" thread, it explains that it was a forum wide error.

He said he is not using an image in his signature.

The OP didn't give the reason why it was down for. All he posted was the error name that everyone got.

So it had nothing to do with OPs signature?

I'm confused as to why it was posted then, I assumed OP wouldn't update us with something that can be found on the Twitter.

So he basically made this thread to say, "Go check Omni's twitter". He says he's reporting in and all he reported was the error.

If this is the case, OP, you should close this thread. The Twitter is there for a reason, to not make needless threads being one.

kamz89 - February 8, 2012, 8:21 pm

I was about to report it. Thanks for posting and saving my time.

Thanks to yellow for letting us know, but I think I won't be able to post because my sig is 650x250 I think.

Edited:

Nope it's 650x200 right on the dot :D

Nostre - February 8, 2012, 8:42 pm

Awesome.

I've been waiting for Omni to add this feature.

Omniscient - February 8, 2012, 8:42 pm

Should be working perfect now.

Yes i know, tons of threads are coming just for an simple error.

it's not a simple error. I got 3 kinda of similar error but the only thing was different which is the folder locations.

Omniscient - February 8, 2012, 10:22 pm

Anyone still getting errors?
