\$harecash deleted his premium account system, and in File-Ice, Im sorry ?

Hello HF Members!

This is my first Service, and I will download* the files from # and other file hostings using premium accounts and uploading it to a direct link host! :D

I will be using a Real-Debrid account to download the files.

*I will use Real-Debrid Remote Upload feature to give you the direct link.

Requirements:

10+ posts

No negative rep (Unless you are my friend or something like that)

Limits:

Files more than 1GB.

Not allowed hosts due to Real-Debrid Limits:

BitShare

DepositFiles

FileApe

FilePost

FileServe

FilesMonster

Furk

Grupload

LetItBit

RapidGator

ShareFlare

TurboBit

Uploading

Vip-File

All survey download sites like \$harecash / File-Ice

Post here a message, then send me a PM with the desired Link

I will reply you the direct link, don't forget to Vouch after receiving the link! :D

You are downloading at your own risk, is your obligation scanning the downloaded file, and remember, you cannot have illegal things lol

P.S: I cannot guarantee that you will receive the link, it depends from various things, like server load, premium account availability... And also, I just have 80GB of direct linking lol

Edit: Giveaway Ended
