YouTube videos are always a good way.

You may have to keep on them though, cause you'll get people telling , in the comments, that it's a virus.

Unless you FUD crypt it, and then bind an actual working file with it.

After about, 2,000+ views, you can disable comments and say "I'm tired of all the people saying it's a virus"

Quite easy, and next time, search, and use proper spelling.
