Thread: [Possible to hack this?](#)

Karlstad™ - February 10, 2012, 5:09 pm

Is it possible to hack this game? : <http://www.pawngame.com/pawn/>

Also I have a hack for it, Someone made it in VB6 but I want to figure out how they did it.
But recently the site updated the .swf file directory.

From <http://www.pawngame.com/pawn/PawnShell.swf> to
<http://www.pawngame.com/pawn/PawnShell.swf?v=1-10>

Anyone help on how I would hack it? :/

I also know that you can bruteforce it.

Coleak - February 10, 2012, 5:17 pm

Umm... Yes, there is a way, but not one in this section. Kbye.

LSD - February 10, 2012, 5:18 pm

Probably have to de-compile the VB program and update the SWF file directory in the program? Idk
I'm just spitballin here.

?Mephobia - February 10, 2012, 5:19 pm

well most swf games can be hacked... i used to hack swf games. i stopped and now forgot about it...

Karlstad™ - February 10, 2012, 5:21 pm

Well when I open the .swf in a decompiler it doesnt show any active scripts for the game.

Immortal - February 10, 2012, 9:35 pm

i remember hacking this game when i first started vb.net xD, I forgot how maybe a good refresher if i
do it again:D

?Demon - February 10, 2012, 10:33 pm

Decompile it, and see what values you need to change. (The SWF)

master4all - February 11, 2012, 1:16 am

mate you can use data tamper addon for firefox to hack online games

The MammoTh - February 11, 2012, 1:21 am

Not the right section for flash games hacking.

Karlstad™ - February 11, 2012, 6:41 am

EDIT: Nvm didnt notice someone moved.

OT: Still need help with this. :/

HaxOr? - February 11, 2012, 7:15 am

I think you can use cheat engine with that shit?

I'm just guessin'.

Karlstad™ - February 11, 2012, 7:19 am

(Feb 11, 2012 08:15 AM)?? ? x O r ? Wrote: [\[CITE\]](#) I think you can use cheat engine with that shit?
I'm just guessin'. Probably I checked out his client code with .NET Viewer and it shows some cheat engine shit..But not the rapid fire and team changing.
But Its a vb6 app. and my .NET REFLECT cant open :/
'C:\Documents and Settings\Me\Desktop\Pawngame\Pawn Trainer v1.0 - SBD\Pawn Trainer.exe' is not a .NET module.
