The smartphone boom is a new money-making revolution headed by Android. It's opening up endless possibilities and it goes on almost unnoticed...

That's why I decided to put all the available knowledge together in Get into Android! The ultimate guide to make money with Android.

Samsung, Amazon, HTC, LG, Toshiba, Motorola, Sony Ericsson and Huawei already trusted their products to Android??¼^a Why shouldn't we?

Get into Android helps you tap into a world of possibilities...

With Get into Android you will discover:

- Hints on the ongoing Android Gold Rush.
- Development of applications explains what apps are for and why people are talking so much about them. How to get ideas for new apps and bring them to life, even if you are clueless in all respects of the computing world.
- How to sell your app teaches effective ways to reach the global market and earn thousands of dollars a month with your apps. What makes a successful app covers the story behind the most acclaimed -and profitable- software on the Android Market.
- Marketing in the mobile age will show you the most effective ways to deliver messages and communicate to the world not only your app but any your product or service you want to promote.
- And lastly we analyze more possible ways to profit from Android. There??¼?äó a whole world of possibilities opening up right now!

Get into Android will help you grasp an ever-changing and stimulating market. Join the Android Revolution!
