Thread: [OMNI READ]Something messed up on HF[OMNI READ]

orunu - *February 10, 2012, 11:11 pm*

This only happens when im on HF, my cursor starts to flash and then after that when i hit space like 20 tabs open up to some HQ movie downloader site, please omni REMOVE w/e this is its getting really really annoying since it started happening 90% of the time i have to write my threads/replies in notepad and C&P, its just getting really aggravating.

Douchebag # 145 - *February 10, 2012, 11:14 pm*

I HIGHLY doubt that this is happening anywhere else except for you, so it is most likely your end which is messing up.
Maybe you're infected. If you believe you are, visit the HJT section.

orunu - *February 10, 2012, 11:16 pm*

im not infected and when this happenes i close my HF tab and it stops, also other people are having the same problem its not just me.

Dopey - *February 10, 2012, 11:17 pm*

Yea, I have never seen any other member with this problem. May just be you.

orunu - *February 10, 2012, 11:18 pm*

(Feb 11, 2012 12:17 AM)Intellect Wrote: *[CITE]* Yea, I have never seen any other member with this problem. May just be you.
again no its not just me i posted somthing about this in the whitehat section before i realized it was only on HF that it was doing it to me and other people said they have the same problem i've ran 5 virus scans and havn't picked up noting.

Dopey - *February 10, 2012, 11:19 pm*

What Web browser are you using when this happens? Have you tried any others?

orunu - *February 10, 2012, 11:20 pm*

(Feb 11, 2012 12:19 AM)ctueddie Wrote: *[CITE]* Nice troll OP.
/inb4repfuck
too fucking short
gtfo off my thread this isn't a fucking troll now gtfo. (Feb 11, 2012 12:19 AM)Intellect Wrote: *[CITE]* What Web browser are you using when this happens? Have you tried any others?
my dad uses MSN broswer and doesn't have this problem i use firefox and when im on HF i have this problem ONLY when im on HF.

Jimmy Page - *February 10, 2012, 11:20 pm*

Woah that's weird my cursor started flashing and there's an ad for a movie. I have hit space but nothing else is happening in. My cursor has been randomly flashing only while on HF, but nothing else.

Gamekilla - *February 10, 2012, 11:22 pm*
It's the browser you're using use another one.

norizz - *February 10, 2012, 11:23 pm*
yea same thing happened to me yesterday and the week before but not anymore
i posted on your last thread and alot of other members had this problem

0_0_ - *February 10, 2012, 11:23 pm*
The same happened to me when I was a regular member, It's the ad's he enabled..

orunu - *February 10, 2012, 11:26 pm*
(Feb 11, 2012 12:23 AM)Lala Wrote: *[CITE]* The same happened to me when I was a regular member, It's the ad's he enabled..
well is it fucking necessary to have 20 tabs pop up for 1 hit of the fuckin spacebar? i mean if your going ot have an ad thing like that enabled use some commonsense. -_-

eiqht - *February 10, 2012, 11:27 pm*
If you really want him to read it, PM him.

Neal Caffrey - *February 10, 2012, 11:27 pm*
Just thought I would point out its happening with me too.

orunu - *February 10, 2012, 11:28 pm*
(Feb 11, 2012 12:23 AM)Lala Wrote: *[CITE]* The same happened to me when I was a regular member, It's the ad's he enabled..
also this makes me wish i had my own comp with BT5 on it -_- disallow scripts from HF? YES!!!! lol..

King - *February 10, 2012, 11:43 pm*
That's a known problem among regular members. Omniscient posted yesterday asking for additional information.

So, if you know the source of this, PM me him.

I Left HF Goodbye - *February 10, 2012, 11:44 pm*
This has nothing to do with the site bro, your infected with something....

irrationalByte - *February 10, 2012, 11:48 pm*
Its not only OP,Its true,I've seen many people complaining about this.

TheVortex - *February 11, 2012, 12:10 am*
Upgrade to l33t to get rid of all ads.
hackforums.net/upgrade.php

Bridge - *February 11, 2012, 12:17 am*
Possible ad problems, I have seen many ad related problems lately.
Also, you could be getting infected by user signatures. I would DL MBAM and post your log in the HJT section.

Diabolic - *February 11, 2012, 12:20 am*
Quite a few non upgraded members have had this.

Ble$$eD - *February 11, 2012, 12:38 am*

This has happened to me, I dont know if it came from HF but it was a infection and the only time it happened is when I was on HF. I would click a link to USER CP or HF home index or something like that and a bunch of different web pages would pop up. So I ran Hijackthis and found that something infected my HOSTs file, and then ran Malwarebytes and got rid of it, whatever it was.

Edit:
This has happened to me while I have been upgraded. So this can happen to anybody here. I should of kept the log but I did not.

UNH - Legendzz™ - *February 11, 2012, 12:39 am*

i Had this problem its a good thing i had malwarebytes Omni check this out please.

Grumped - *February 11, 2012, 12:42 am*

Also had this problem.
Think I am now key logged by the looks of it.

PandaHaxor - *February 11, 2012, 12:43 am*

Hey bro this has happened to me aswell but only when i wasnt logged in. So considering you not a upgraded member and everyone saying its never happened to them are upgraded. I think its the ads on the site.
I thought i was infected and i was like wtf ive only been on HF...

Nothing is wrong i hope i have helped you. :)

BerzerkT - *February 11, 2012, 12:44 am*

This has already been suggested and Denied before. We recommend you take the time to read the HF Help Documents section. The answer to your questions should be contained in there.
To remove these ads and get rid of flashing cursors download AdBlock (if you don't wanna support HF/omni) or Upgrade to support them.

Exploithero - *February 11, 2012, 12:46 am*

I have the same problem! Its really annoying... Please do something

cromwell600 - *February 11, 2012, 12:47 am*

This happened to me too. I was reading some threads in the cryptographic section. I noticed there are some threads that has an advertising on the bottom of the page. If I click the X button in the right bottom corner of the ad, the cursor returns and no more ads are opening. I'm sure it's not an infection.

Slot??h - *February 11, 2012, 12:51 am*

Just download AdBlocker if you use Firefox and you're saved.

Snoopy - *February 11, 2012, 12:58 am*

This is happening to most people in the US, but I don't know where you are from OP.

Luckily, I don't get these.

BritishKitten - *February 11, 2012, 1:02 am*

I've never experienced these, But I guess since I have AdBlock and I'm an UB3R means I didn't get them, It must be freaky though :o

Sylenth - *February 11, 2012, 1:12 am*

Fortunately ads don't show up on HF for me.

Mulle - *February 11, 2012, 1:20 am*
Get adblock I guess.. Or use another browser as said.

Drop - *February 11, 2012, 1:27 am*
It's also happening to me! Firefox, windows xp

LeetOne - *February 11, 2012, 1:30 am*
Happens to me too, it's hackforums, whenever I close it, it's all normal.
Also, ads open up too.
Like 20 ads open up.

dismayed - *February 11, 2012, 2:00 am*
Just use adblocker, done

Omni doesn't have to lift a finger

Neal Caffrey - *February 11, 2012, 2:29 am*
Switched to Chrome, used Adblocker, works fine.

confuse - *February 11, 2012, 2:43 am*
I have heard of this happening to several normal members. Seems Omni wants to put more stress on upgrading.

ksgh - *February 11, 2012, 2:47 am*
You know, this is happening to me. I don't get the 20 tabs though. I got overlapping sound? From ads... My mouse flickers with like a yellow box? It's only Hf. So yeah...

Neal Caffrey - *February 11, 2012, 2:56 am*
(Feb 11, 2012 03:43 AM)Confuse. Wrote: *[CITE]* I have heard of this happening to several normal members. Seems Omni wants to put more stress on upgrading.
Its only become like this in like last few weeks or so I guess.

Marko - *February 11, 2012, 2:58 am*
Happens because there are ads on HF that have sound and sometimes video on them. I am not sure about the tabs but for the cursor its the ads I am sure.

010100111001 - *February 11, 2012, 2:59 am*

To remove these ads and get rid of flashing cursors download AdBlock (if you don't wanna support HF/omni) or Upgrade to support them.And I recomend you stop mini modding, if you read this thread then you would realise that Omni wants more information on it.

So gtfo.

Diabolic - *February 11, 2012, 3:56 am*
You'll just have to wait or PM Omniscient directly.

The Alex - *February 11, 2012, 4:00 am*

This must be just you, I've never had this problem and I'm pretty sure that no other member will have this problem. You should really head over to the HJT area and diagnose it, no matter how many times you say you're not infected you most likely are

phishle - *February 11, 2012, 4:01 am*
You're not the only person having problems- while I'm visiting HF, my bowser will occasionally block a pop-up window, and then the current tab will redirect to a heavy.com link. Happens to me all the time while "previewing" a post, get's aggravating after awhile. PC is completely clean of infections and totally virus free.. and this only happens while browsing on HF.

The Alex - *February 11, 2012, 4:03 am*
(Feb 11, 2012 05:01 AM)phishle Wrote: *[CITE]* You're not the only person having problems- while I'm visiting HF, my bowser will occasionally block a pop-up window, and then the current tab will redirect to a heavy.com link. In that case I would recommend downloading an AD Blocker and see if that fixes the problem?

What browser are you using out of interest?

Maybe you're infected. If you believe you are, visit the HJT section.

As we are upgraded members, we don't face many things like this.

But non-upgraded members get weird ads, pop ups and many stuff like that.

Many of the links they get are infected and they have no guarantee they are safe.

Orunu, my advice is to use a Adblocker and a flash blocker or get upgraded to L33T or Ub3r.

https://hackforums.net/upgrade.php

Quote:Removal of all ads

The Guardian - *February 11, 2012, 7:41 am*
Infected ads/Annoying ads I guess...

orunu - *February 11, 2012, 9:46 am*
to the people saying im infected and to download MBAM i DO have MBAM and i ran like 20 scans with it and the only thing it picked up was my netcat.exe (which is a false positive due to it being a program that creates a backdoor on a website to the host of the netcat.) (Feb 11, 2012 07:13 AM) T?¢hie Wrote: *[CITE]* As we are upgraded members, we don't face many things like this.

i'll be upgrading to 1337 soon somone else is buying it for me because omni already has my IP from me logging into HF so i wont be buying 1337 myself, sorry omni but no GeoIP for you D: i just PMed omni about this, waiting for a reply.

Makaveli The Don - *February 11, 2012, 10:39 am*
Download an antiad program and stop those ads. Also you might check if your pc is infected to prevent.

tomchez - *February 11, 2012, 10:41 am*
Happened to me before, it was one of the various advertisements, I downloaded Adblock Plus and it stopped.

Jam2556 - *February 11, 2012, 10:44 am*
It's the advertisements, that is all. I've seen a few similar problems with other members.

Arckos - *February 11, 2012, 10:53 am*
I've never had this kind of error hopefully you figure it out man

Confiscate - *February 11, 2012, 11:02 am*
happend to me also. i just thought i was infected and i did like 20 virus scans :p

DaL33T - *February 11, 2012, 11:05 am*
It's happened to me before as well.
It's probably one of the ads as some people have said above.

Dreamcaster™ - *February 11, 2012, 11:07 am*
How come it is happening to people who are leets/ubers?

I thought that ads arent shown for upgraded member?

Atleast I cant see any ads.

//

Energy™

Pir4T - *February 11, 2012, 11:36 am*
lol, Omni wants you to click those ads. That's how he makes most of the money out of. He probably noticed not many users are clicking those ads so he decided to put something so you'll click those ads.

inb4 Omni's HF income triples this month.

Adverse - *February 11, 2012, 11:39 am*
Yup this happened to me also adblock plus is the way to go.

AUTISMUS MAXIMUS - *February 11, 2012, 11:41 am*
i had this problem as well
Adblock Plus will stop it.

-Joker- - *February 11, 2012, 11:46 am*
Yeah this has happens for me just get an adblocker

Eruditus - *February 11, 2012, 11:49 am*

1. Some rogue ad caused it
2. You're possibly infected.

Solution: I suggest you use as others have said, Adblock Plus.
You can find the homepage for Adblock Plus here:
http://adblockplus.org/en/
I would recommend you maybe upgrade here as upgraded member do not get bothered by advertisements.

Adblock Plus is a good tool for other sites which usually have pop-ups in-store though.

Vexna - *February 11, 2012, 11:50 am*

Here is the solution of your problem. Click me.

Pir4T - *February 11, 2012, 3:14 pm*

(Feb 11, 2012 12:50 PM)Vexna Wrote: *[CITE]* Here is the solution of your problem. Click me.
Then, Omni should just make this site that you have to pay the l33t amount to visit this site.

Disinformation - *February 11, 2012, 3:16 pm*

I have this issue aswell. annoying as hell

exie - *February 11, 2012, 3:26 pm*

If you upgrade, you won't get any ads.

or, get adblock plugin for chrome, I believe there is one for firefox too.
https://chrome.google.com/webstore/detail/gighmmpiobklfepjocnamgkkbiglidom

Ace Boogie - *February 11, 2012, 3:27 pm*

I posted a thread about infected ads a while ago. Back then, no one really cared about what I said. Use AdBlocker Plus to stay safe:

https://hackforums.net/showthread.php?tid=2056920

redpois0n - *February 12, 2012, 4:12 am*

My mouse also flash sometimes. Only on hf. wierd

Chris.. - *February 12, 2012, 11:32 am*

Ive had this problem a few times, its rather annoying!

James Kirk - *February 12, 2012, 12:30 pm*

(Feb 11, 2012 12:14 AM)Yellows Wrote: *[CITE]* I HIGHLY doubt that this is happening anywhere else except for you, so it is most likely your end which is messing up.
Maybe you're infected. If you believe you are, visit the HJT section.

This happened to me too, its not only him.
