Thread: [\[CHEAP\] RAT Setup Service + Tips on Crypting/Spreading - \\$2 \[Legit\]\[Trusted\]\[Vouches\]](#)

Ghost.13 - February 11, 2012, 7:15 am

Good day HF!

I'm doing another "great" service for those of you who can't do this right.

My service is all-in-one, either it's a full RAT setup including port forwarding and tips for crypting and spreading. I can also throw in lifetime support if you have any problems. All in for just \$2.

I can setup DarkComet, CyberGate, or BlackShades for you. If you have VPN services like nVPN, I can also get it configured to work with your RATs.

I don't do crypting services, for the simple reason that I respect the coders' hard work for updating crypters. You wanted your server to be crypted, buy a crypter or take the risk of crypting services.

The only requirement is for you to have TeamViewer (for personal assistance).
If you don't have TeamViewer, you can download it for free in the following link:
<http://www.teamviewer.com/en/download/index.aspx>

To avail my services, you can either PM me here for details, or you can add me on Skype.
My name there is ghdrive13. When you add me, include the note:
Code Hi Ghost.13, I'm <insert HF username here> and I need your RAT setup services.
Thanks.

After the service, I'd like you to leave a feedback here, either it's a compliment or a criticism, that's fine with me.

Please take time to read this short and simple Terms of Service
Code Terms of Service (just in case you might complain)

1. All services stated above are LEGIT, and this is not a scamming service.
2. All payments will be made [b]AFTER THE SERVICE IS COMPLETED[/b], [b]BUT[/b] in some cases, I might require a downpayment, especially if it's a FULL SETUP.
3. If a service is not completed due to software/hardware issues, connection problems, or non-computer related events like refusal of the client, my refusal to continue, lack of time, etc.,[b] NO PAYMENTS WILL BE MADE[/b].
4. I do not tolerate any form of sh*tty transactions. I can and I WILL file a dispute against you if you wanna play games with me, and I can assure you I will have all proof.
Payment methods are PayPal and Liberty Reserve only.

He's contributed a lot in the beginner hacking section and I haven't seen anyone complain. Besides if this doesn't work, you don't pay him :)

Sorry for the unanswered PMs and requests both here in HF and Skype, didn't had the time to mention that I was going to have a 2-week vacation to wrap up school.

Btw, summer just started, so the service is back online.

Just PM me if interested.

Good day.
