Thread: [\[SCHOOL\]Peel's Virtual Classroom-Angel\[SCHOOL\]](#)

V For Vendetta. - February 11, 2012, 8:30 am

I found an error in Peel's Virtual Classroom aka Angel. This is what the message says:

Active Server Pages error '00000000'

Create object failed

?

An error occurred while creating object 'Activator'.

Microsoft VBScript runtime error '800a0005'

Invalid procedure call or argument: 'Activator'

D:\INETPUB\ANGELSITES\ANGEL\ANGELROOT\ERRORHANDLING\../Include/_common.asp,
line 27

This is the website of the error:

<http://angel.peelschools.org/default.asp>

Any idea what can be done to this website? I need this asap. :D
