It all depends on how you use them. If you boot all the time, the website might go down(because

the hosting it is on will see the stress)

The Would strongly recommend that you buy some dedicated shells. Those are gaurenteed to last atleast a week or two, I even have some from this summer!

you you scanned the shells and tested the very 1st shell and did not open any other shell up, all the scanner does that you used was say that the links are working, it does not say, udp shell or tcp shell get that right, all your doing is hurting yourself by shitting people man, people work hard for there money and you just to give them shit ass links in return thats not cool!

and ok, refund me my money then, or give me the 100 shells i purchased, why is that so hard?

I have dealt with so many trolls over my day and am not a scammer.

After 1.5 hours of working to get my teamviewer and VPN working at the same time, and showing you proof over teamvewer that it didn't work, you said you didn't want my method anymore? Who's the scammer? I am still offering you this. Please stop being an impatient 12year old and put yourself in my shoes. 1:30am and you are saying you don't want it after I prove that it works? Bought his \$65 method last night and was promised he would login to my teamviewer to show me how to operate it. He just sent over files and disconnected and said, "Oh, sorry. I am on TV with someone teaching me something right now."

Since then he signs on and when I message him he signs off or goes invisible mode. I'm new to a lot of this and was hoping that he would follow through on his word of instructing me.

Will give it a little bit longer in hopes he reaches out to me so we can get this done. I know this isn't a huge deal for most, but for novices it is so if you are a novice then this may not be the purchase for you because support could be better. I'll remove this if Uranium gets back to me and follows through on what he told me.

I have no need to exploit shells. Its kind of pointless, people will say they are dead and chargeback. Not worth it.

Appliance Warehouse - August 26, 2012, 8:13 pm

Still selling my method. Works like a boss. IF your intersted, hit me up in a PM

Appliance Warehouse - August 28, 2012, 10:13 am

AKA, no chargebacks.

I wish I could help you with that bro, but the truth of the matter is that exploiting shells is a very time

consuming process which yields very little reward. Very little revenue. Not to mention all the shit I got to go through to deal with chargebacks because 1 shell is dead. ITs ridiculous.

All in all,(in my experience) this is the way to go. Sorry.

?

Dirt Stacks - September 3, 2012, 9:57 pm

I'd buy the method , but the only way I can pay right now is with credit-card since my paypal is "verifying" my creditcard.
