Thread: [Best Botnets ? :: Dark DDoser or DDoser or Nilus or Host Booter ::](#)

FI0r1an - February 12, 2012, 5:36 am

Hello , I would like to take a botnet, but I would like to know which one is best, levels stability, options, etc....

- 1 : Nilus
- 2 : Dark Ddoser
- 3 : DDoser
- 4 : Host Booter

Which advise recommend me you ?

BadB - February 12, 2012, 5:49 am

Nilus. By far. Trust me. If you don't you will regret it :)

irunbremen - February 12, 2012, 12:09 pm

I would consider to nilus, too, but i am still waiting for the next update :)

9an9sta_Unit - February 12, 2012, 12:23 pm

I've never heard of nilues, so I'd say DDoSer.

RhymeSayers - February 12, 2012, 12:24 pm

I have a question on this too, I used to use Hosterbooter ahwile ago, and i could only make it so 1 person can log onto it. Out of those 4 which would be better for more than 1 user to log onto it.

BadB - February 12, 2012, 10:15 pm

Updates for Nilus are out

<http://www.nilus.org/>

BiH - February 12, 2012, 10:20 pm

i would say nilus is nice too, amazing for herding a great amount of bots plus very stable, i loves me the form grabber too?

GoldenBall - February 20, 2012, 9:10 am

Do you have a link for the nilus or any of the other ones? and are they free?

Vater - February 20, 2012, 11:06 am

If you are really serious about botnets you need to try and stay away from clients. I personally like irc.

/MsfConsole - February 25, 2012, 10:54 am

1-Hostbooter seems to be the most powerfull of all !

2-IPkiller is very good too !

3-IRC bot are powerfull too :D

Max.schoops - February 25, 2012, 2:11 pm

3-IRC bot are powerfull too :DYou notice most bots use the same method for a udp attack right? Same with shells. You are probably the dumbest skid ive ever seen.

Tall Hulk - February 25, 2012, 4:40 pm

From a tester & i use them all. DDoSeR & Nilus Is very good for hitting and spreading. Host booter nor dark ddoser compares to them. But if your hardcore spreading use nilus if booting use ddoser.

Damfam - February 27, 2012, 7:58 pm

Could anybody Provide me any links to theses botnets or irc's, I need one to host my bots on

derekkk - March 1, 2012, 2:25 am

i use quantom but i need a better ddoser.

Tall Hulk - March 9, 2012, 5:49 pm

www.ddoser.com

<http://www.nilus.org>

.Ant - March 9, 2012, 6:33 pm

Host Booter (xr) for sure. You will not regret it

B O W T 3 C H - January 13, 2013, 10:39 am

i agree, all udp dos servers will be about the same in power. you should be focused on which are the most stable for retaining your infections.. iv owned ddoser for a long time. the site is currently down. but its not real stable . also you need to look into what crypters will work with each one. and how long the server typically stay FUD .. iv never owned hostbooter but iv seen alot of kids retain a good number of infections with it. never seen nilus .and iv heard that the guy who sells ipkiller cant code in what the program is coded in... so wouldnt recommend it .

eTry - March 5, 2019, 5:26 am

Honestly, as far as HTTP botnets are concerned most of the ones aren't going to be powerful. You're better off creating a telnet and using HTTP scripts.

WhatTheLeak - March 5, 2019, 7:53 am

It's from 2013 :P
