Quote: How to make glossy button in photoshop

I looked for this in youtube, I've watched some videos, and well, it doesn't really explain anything ... :(

Well, I never took any tutorial for Photoshop, just look at with attention the other works, try to imitate, use your own techniques, and you will learn like that ... :)

You can create it with the "Rounded Rectangle Tool" :
[img]http://i.imagehost.org/0609/tool.png[/img]
Put a very large "radius" (50-60px), then create the shape on the Workspace.
Then, right click and "Fill" !

Thank you very much for uploading this! ?
As promised, here is mine, it's CS2 :
