Thread: [\[FREE\]GeoGen Simple Keylogger v.2\[FUD\]](#)

Albertino - January 2, 2010, 12:20 pm

[img]http://img696.imageshack.us/img696/7594/geo.jpg[/img]

Hi guys,

My closest friend GeoGen just created simple keylogger from my sources for your use.

Features:

Send to Gmail with a backup FTP upload (that mean you can pick FTP as backup upload source, so if Gmail fails to send the logs it will be sent to FTP).

Smart logs (Smart backspace, Shift, Caps Lock, NumLock and etc...)

Improved data sending from v.1

The program is written in VB.NET, that mean the client must have Net Framework 2.0 installed.

Enjoy!!!!
