Congratulations! You did a good job on the deface :D

H0?p0ck3T - February 15, 2012, 5:57 pm

Pretty good but I would have put the log on part after the vulnerabilities part. ?

SsSam - February 15, 2012, 6:00 pm

thanks for the tips

ahhh im bored I will post admin login...

USER: administrator

PASS: sahara

Admin login page: <http://www.medep.org.np/admin>

xD love you guys!

very nice deface! i like it.

congrats on your first deface :-)

If I might say something about the defacement page itself.

The flashy logo thing is annoying as ****! Cursor is pretty ugly. Email should be in the "console" not in the title. Right click alert always annoys me.. why wouldn't you just disable it instead (if you don't know how to, I'll give you the code). The font colors are terribly matched. "Welcome blahblah" is totally unnecessary. ENCRYPT YOUR SOURCE. Don't refer to yourself as WE. Remove marquees
_ _

Well that's just my opinion, don't take it too seriously. it's still better than most defaces I've seen :)

regarding the "hack" itself, it's not that bad but <http://www.medep.org.np> doesn't sound too popular.

BTW. if you would decide to take my advises, test your defacement page @ <http://pastehtml.com/>

The site is down. Maybe you should upload an image for us to check it out.

Well considering it was my first deface, the site doesn't have to be popular.

Yeah, looks like they caught it. Site totally offline now.

H0?p0ck3T - February 16, 2012, 2:53 pm

lol That is pretty funny. I wonder how many rank my hack points it was worth.

Did you happen to get a 404 page in there? They almost never look at those.
