Thread: [can i craete an anti virus in visual basic](#)

SIM-135152 - January 2, 2010, 5:17 pm

hey please i just need to know if i can create like an anti virus in visual basic just tell me yes or no because i didn't start learning vb but i have posted a post [what is the best way to learn visual basic .net](#) please if you have the answer please i need it
thanks for every thing

D3viL - January 2, 2010, 5:21 pm

Yes You Can. There Are Many Antivirus Coded In Vb.

Entrepreneur - January 2, 2010, 5:29 pm

I am coding an antivirus in Vb.Net at the moment. It will be released on here very shortly.

SIM-135152 - January 3, 2010, 3:15 am

ok thank you and I'm waiting to see your av

CraizerVFX - January 3, 2010, 3:18 am

its possible yeah, Ic has an example source of one somewhere.
its really easy imo. but thats because i know visual basic pretty well.

D3viL - January 3, 2010, 3:22 am

here...credits to gizsho..

Code <http://www.#/?d=DDHE8NSS>

Manzzup - January 3, 2010, 3:42 am

heyy i got an idea, you can make a nice AV for your own VIRUS :DDD
soo you can make some grand virusez and spread them
then sell your AV
hows tat?

SIM-135152 - January 3, 2010, 4:13 am

haha good idea i will try haha

Sikandar - January 3, 2010, 4:28 am

just be ready if you'll be caught by microsoft.....:)...lol

SIM-135152 - January 4, 2010, 11:57 am

haha thank you brothers but do you have a source on how to make the antivirus please

Soul Collector - January 4, 2010, 1:35 pm

Well yea, you can make Anti-Virus in Visual Basic. If you need src code or anyone else, feel free to PM me. ?

newbie223 - January 4, 2010, 2:02 pm

1 thing about an antivirus is u'll need to update the database on and on and on ass your antivirus depends on md5 so yea abit troublesome anyways gdlk

SIM-135152 - January 5, 2010, 7:06 am

thank you all guys i thank god i found hack forums for you people

pp_love - January 5, 2010, 7:35 am

It's possible, you can create almost anything in vb since allows you access to the win32 API.

It will probably be more hassle than it's worth. It would probably be best to create a firewall or something, much better and less managment.

Estemirilix - January 5, 2010, 7:44 am

You can create an antivirus. But with your posts and low skill you can't and nobody will give you source for it for free, plus you would need to understeand the source wich I doubt you can. Sorry for being harsh but thats the truth.

You need to learn to crawl before you can walk.

SIM-135152 - January 5, 2010, 12:11 pm

hey dude i know the basic of vb and i'm startting to learn this language and some one gave me a code and i understand it but not so mush hey i learn like this but first what i need is to know i can do this and you all answered me

Joey K - January 5, 2010, 12:31 pm

If you want to create an anti virus in VB, learn VB.

SIM-135152 - January 5, 2010, 12:41 pm

i'm learning it but before i learn it i just wanted to know if i can do this

Sketchy - January 5, 2010, 1:39 pm

(Jan 3, 2010 05:28 AM)sikandarnandwani Wrote: [\[CITE\]](#) just be ready if you'll be caught by microsoft.....:)...lol

what will microsoft do? If you code it by your self then microsoft cant do anything. If you copy it then yes you will get sued

Estemirilix - January 5, 2010, 1:50 pm

(Jan 5, 2010 02:39 PM)AmIHacking Wrote: [\[CITE\]](#) what will microsoft do? If you code it by your self then microsoft cant do anything. If you copy it then yes you will get sued

Well yes but he cannot code it for now. So he will leech it from someone and get sued.

SIM-135152 - January 5, 2010, 2:10 pm

Thank you very much and i don't know why Microsoft will caught me .

Estemirilix - January 5, 2010, 2:41 pm

First of all I will tell them or the dude who gave you the code, second they are not stupid, third you would be hyper like : "Yay yay I coded an anti-virus lets go off and show it to my friends". One of them might be smart enough to look it up and tell microsoft. And well lets just say it is really hard to code it and you won't make it, neither will anyone...

SIM-135152 - January 5, 2010, 3:04 pm

What i didn't understand what you are saying now first i didn't call anyone a stupid and second the people ho gave there code they aren't stupid as you say no i'm not a thief to get there code and be happy no i love programming and i'm learning the vb .net as you see in my post but just what i was of needing is to know if in this language i can make a anti virus then they say yes and i thought i need more so i need the tags or i don't now what are called the words that i will use to make this how to do this not copy it if you do this I won't .

Estemarilix - January 5, 2010, 3:19 pm

Sorry to tell you dude but you need to learn English language first, your grammar is terrible and you can barely make sense when posting.

As I said: "You need to learn to crawl before you can walk".

That means you must first learn to understand the code and start with basic projects, when you learn that coding an anti-virus will be boring/lame for you.

And I will not repeat this anymore : YES YOU CAN MAKE AN ANTI-VIRUS IN VB.

(Sorry for rude words, being harsh and caps)

Sketchy - January 5, 2010, 3:24 pm

(Jan 5, 2010 02:50 PM)Estemarilix Wrote: [\[CITE\]](#) Well yes but he cannot code it for now. So he will leech it from someone and get sued.

That's only if the code is copy righted. If it isn't then the maker of the anti-virus can go get a copy right and sue the leech that he got it from to get money. Yeah life sucks

PS: Microsoft is not the one that will be the one suing unless the code is from Microsoft.

Estemarilix - January 5, 2010, 3:30 pm

(Jan 5, 2010 04:24 PM)AmIHacking Wrote: [\[CITE\]](#) That's only if the code is copy righted. If it isn't then the maker of the anti-virus can go get a copy right and sue the leech that he got it from to get money. Yeah life sucks

PS: Microsoft is not the one that will be the one suing unless the code is from Microsoft.

Well if he wants his anti-virus to be good, famous and detect viruses, then he will go ask for help from Microsoft or go to Microsoft and leech. Yes there is vb.net Microsoft site with a lot of pro coders.... But they are white hat only. And it is very hard, you would have to update the database every now and then. Since new viruses are created every day. And if you sell it you would need to make a licence with a strong encryption.

SIM-135152 - January 5, 2010, 3:34 pm

(Sorry for rude words, being harsh and caps)

hey i don't know what you are talking about i know i'm not an english man and sorry for my language but i knew that i can make an antivirus and for me programming is not boring and will never be because i love these things

and i will never hate it and note : I'M NOT A THIEF !!!!! remember this and if you don't want to give me the code don't give it to me but remember some people trust me here

thank you all

SIM-135152 - January 6, 2010, 12:52 pm

hey man if you think this is good don't think

cease you don't have the permission to give me - but

and if you want to know something my -2 is cease i gave a link to my website

in a thread so remember people trust me and if you don't get away

Estemarilix - January 6, 2010, 1:30 pm

What will you do if I don't get away?And I have promision to give you -rep.I am trying to help you
and you tell moderator to delete my post?

J0hn - January 6, 2010, 5:00 pm

Well to be honest if you were to make one i'd keep it for personal use and not to distribute a virus
but if you don't think you will be caught (HIGH chance you will be) then go for it, also if your fairly
new to coding this wouldn't be an easy program to code.

[Chocobro] Nilef - January 6, 2010, 11:29 pm

You are seriously annoying me.

Don't try and judge anything by his post count. Also, don't criticize his English, when you can't
fucking use it properly yourself.

Dude what are you talking about. You cant get sued for any other reason other then copyright. If it
is copyrighted then you can take it and put your name on it and go copyright it.

Plus i really doubt his anti-virus will be that good.

PS: I don't remember Microsoft having there own anti-virus. So what is there to steal. And really
how the hell is he going to be good enough to work for Microsoft. Im pretty sure they do a test on
you.

Dude if I wanted to make an anti-virus I would go Microsofts/visual basic main site...And ask for help.

And I do not underestimate him I think he will give his best when creating one and I hope he tryes hard to create it.

Do not let others discourage you, you can make best anti-virus if you just try hard....

Skajper - January 7, 2010, 10:16 am

Yes you can create an anti-virus in vb.

Is iNuke really your brother?Aww man thats disgusting....

ToLeGiT - January 7, 2010, 11:07 am

Yes you can create a Anti-Virus in vb.

(Jan 8, 2010 01:11 PM)BETAhkr Wrote: [\[CITE\]](#) This was a dumb post, Why COULDN'T you make an anti virus?

hey that's not a dump when i posted this i didn't know anything about vb .nt and now I'm learning it this is all

(Jan 9, 2010 05:21 AM)john-smith Wrote: [\[CITE\]](#) lol how is he going to copy source code

no man i told you that i'm not a thief i need the way to write the code not all the code i need to learn haw that's t

SIM-297877 - January 9, 2010, 9:48 am

Its is simple to make a Anti Virus, Just get if virus info (The code it is made of) and make a form that scans for all the virus codes, then wen it finds them make it so it shows you all of them in a listbox, and add a butten to delete them...

im building one now i adding a auto update for updating the virus data base... It simple but you will need some time to get it all right... stay tuned for updates on mine i estimate it will be about 3 weeks for me to get the beta out. so stay tuned!!!

(If Anyone wont more info on making a Anti-Virus PM me)

HERE IS SOME CODE YOU CAN USE:

[DOWNLOAD HERE, IM USING THIS FOR MINE.](#)

SIM-135152 - January 9, 2010, 2:12 pm

oh thank you man you are helpful and thanks for the code is very imp
