Thread: [RAT - - Remote Administration Tool - - RAT](#)

Bill Nye - February 17, 2012, 8:12 pm

(System.out.println("Hello Members of HackForums, it is I the great TabletMonster");

^^I know it's Java ?^^

Well, I know the gist of a RAT and I think I know the basics but I would really like to get one set up for my self and use it on people I don't like; More like personal warfare against fellow students or teachers, but I don't have a RAT a "server" or anything "fud" (I don't know what I have to do with a server.exe and what it has to do with fully undetectable and what is crypting?

Basically I just want to know the following.

What is the best FREE RAT?

How do I set it up (tonight) and the most simple and fast way?

What do I do with a server.exe?

What is crypting?

How do I make whatever I need to make FUD, FUD?

How do I bind word documents to a RAT?

Where can I download the best FREE RAT?

I would very much appreciate any help at all, any information and anything I need to know about getting this done. I would like to get this all set up TONIGHT and as fast and simple as possible. It is 11:05 PM 2/17/2012.

I know I have to port foward and that shouldn't be a biggie, I can do it. I need to get this done tonight as I have an evil plan ??? bahehe.

Well thank you very much for everything HackForums ?

-Your greatest, TabletMonster

Yoshi_Backpacks - February 17, 2012, 8:13 pm

a rat is something in your house jkjk

Lol mate. Na but seriously I need some help.

Rowen - February 17, 2012, 8:15 pm

Hello there Tablet Monster :)

Best Free rat? Dark Comet by far! <http://www.darkcomet-rat.com/>

Set it up? Well pm me for a team viewer session

Server.exe is the virus, spread it to people, rename it whatever you want

Crypting makes the virus undetectable by anti viruses, easier to spread.

Crypters make FUD [Fully undetectable, by AV, a temporary thing until AV learn of your crypt]

Get a good binder

See the 1st

BlueDanube - February 17, 2012, 8:17 pm

1. My opinion, DarkComet

2. Follow a tutorial on DarkComet: <https://hackforums.net/showthread.php?tid=1633323>.

3. You crypt it to make Anti-viruses ignore it. You use it to spread it to other people and infect them with it.

4. Crypting makes the server UnDetected or Fully UnDetected.

5. You make it FUD by downloading a crypter and selecting your server and clicking "Crypt" or whatever the crypter's button says. Most crypters include other features.

6. The binding part should be included in the features of most RATs and/or crypters.

7. My opinion, www.Darkcomet-rat.com.

BlueDanube - February 17, 2012, 8:24 pm

It looks like Rowen is offline, but I could help you if you'd like.

EDIT: Alright ^.^

Do you have Skype and Team Viewer? PM me with some information mate, I am so excited to get this all set up, thanks! ??

BlueDanube - February 17, 2012, 8:29 pm

Yes, I have both. PM Me your Skype name and we'll go on from there.

Rowen - February 17, 2012, 9:16 pm

Dear Tablet, no skype. I can find a good guide or you can go with We*Are*One, but I don't have skype or a webcam.

Mario - February 17, 2012, 9:18 pm

What is the best FREE RAT?

I would say Cybergate. Darkcomet is good too

How do I set it up (tonight) and the most simple and fast way?

There is plenty of tutorials in the Rats section. Its not very hard

What do I do with a server.exe?

Thats the file you need to get your victom to open in order to infect them and get the connection. Dont open it your self.

What is crypting?

Makes server.exe undetectable from anti virus's

How do I make whatever I need to make FUD, FUD?

With a crypter

How do I bind word documents to a RAT?

As far as I know, you cant

Where can I download the best FREE RAT?

Plenty of places to download in the tutorials on the RAT section

Any questions then feel free to PM me. I prob wont look back on this thread

Bill Nye - February 17, 2012, 9:31 pm

/thread

Thanks We*Are*One ... hahahaha Error_404 JavaPlugins... Fuck! I forgot. \facepalm...

lol ^^ inside Skype Joke ^^

Thanks for you help everyone it is very much appreciated!

I am now the proud owner of a working DarkCommet RAT! But it is not crypted.

watersalle - *August 29, 2012, 4:33 am*

i want to buy blackshades software but i dont know how to use it or set it up. anyone who can help am ready to give out some \$\$ and you have to make the server fud

anacroe0101 - *October 27, 2017, 6:23 am*

So, wich is the best RAT from this forum?

Ashish882 - *October 28, 2017, 5:45 am*

The fatrat is best tool that I used you need kalilinux to install this
