Thread: [which crypter do you recomend? no\\$crypter/star crypter/threat conceal/icrypt](#)

sandra1 - February 18, 2012, 12:34 pm

i just bought father crypter a week ago for 70\$. couldnt make even one fud server. i don't want to be scammed again. please put here your opinion according to experience, which crypter is the best one.

thank you all

xPoverty - February 18, 2012, 12:46 pm

DarkEye sounds really good , but wait for more ppl to comment

Pumpkins - February 18, 2012, 12:57 pm

to be honest even 3/4 detections isnt THAT bad, but it's personal preference, for ease i'de pick star crypt, for functionality, i'de pick ThreatConceal, for compatibility? iCrypt.

Anatomy - February 18, 2012, 1:00 pm

I use cryptex 0/37 everytime. Well worth it even though they are having some problems atm. O-o

Silexx - February 18, 2012, 1:04 pm

i currently have icrypt but it gets detected in a day or two so im also looking for a new one

sandra1 - February 19, 2012, 2:56 am

(Feb 18, 2012 01:57 PM)Soxs Wrote: [\[CITE\]](#) to be honest even 3/4 detections isnt THAT bad, but it's personal preference, for ease i'de pick star crypt, for functionality, i'de pick ThreatConceal, for compatibility? iCrypt.

hello Soxs, it's interesting , it sounds like you tried all these crypters, can you please explain with more details about each one?

(Feb 18, 2012 02:04 PM)itachi09 Wrote: [\[CITE\]](#) i currently have icrypt but it gets detected in a day or two so im also looking for a new one
do you have anyone in mind? if so please explaine.

hey everyone ,

please go inside vote and/or put your ideas

UnEntitled - February 19, 2012, 6:21 am

No\$Crypter is really good. It doesn't stay detected for very long. And it's only \$15.

.CRz - February 19, 2012, 6:59 am

Just to inform you that my crypter will have few votes becuse i also have few customers by purpose of Long Lasting FUD, i also have a Minimum Requiriments before buy.

sandra1 - February 19, 2012, 10:20 am

hello!!!, i need more opinions please.

Invulnerability - February 19, 2012, 10:28 am

I would suggest you go for CrypteX
Take a look if you have time

.CRz - February 19, 2012, 11:11 am

In my opinion n0\$crypter will have the most percentage of votes as lot of people use n0\$crypter.

Decker - February 19, 2012, 11:15 am

I've used Threat Conceal in the past and was less than pleased with it and the support, but that was months ago. I wouldn't resubscribe to it again.

The best crypters on HF that I've used are No\$crypter and Sheikh. The only issues I've had with either are relating to the binders. Sheikh Crypter's file binder always gives me .net errors and No\$Crypter binder makes it detected to Avira. No\$ crypter keeps files crypted for the longest by far that I've seen.

BlueDanube - February 19, 2012, 11:20 am

(Feb 18, 2012 01:34 PM)sandra1 Wrote: [\[CITE\]](#) i just bought father crypter a week ago for 70\$.

thank you all

I choose NO\$Crypter. I've always received 0/37 detection rates on my files. It has a built-in scanner feature and automatic updates. Plus it's only \$50 for lifetime and it's well worth it.

zerocool - February 19, 2012, 11:24 am

This is amazing i have just got this and it does all you ask give it a look

2012 Crypter ? C# | Binder | Worm | Cloner | Spoofer [40+ Features] [20% Off]

why would you think TC is better? please explain

i?fe??ø - February 19, 2012, 1:16 pm

I have 3 crypters, Sheikh's Protection & No\$

Out of all of them I like n0\$ best, easiest to use and is FUD most of the time.

When I was buying Protection I looked into ThreatConceal and it also seems like a great product,

so I voted for both.

Decker - February 19, 2012, 3:17 pm

(Feb 19, 2012 01:56 PM)sandra1 Wrote: [\[CITE\]](#) why would you think TC is better? please explain
He'll think that because he's the creator of it.

JAC Modding - February 23, 2012, 5:17 pm

Too be honest i hav been looking for alot of crypters just looking for the best one

Filthy Rich - February 25, 2012, 3:49 pm

Yea ive been looking around aswell, trying to find a crypter thats cheaper that icrypt and threat conceal but im still willing to pay around 50 bucks and i want a good binder and FUD atleast 6/7 days

Warrior™ - February 25, 2012, 7:58 pm

hey i am use also father few days ago but its stub detecet 8/37.but now i am use 2012 crypter.its great its never detect last one month.n30night build this crypter he is verry supporting guy.

<https://hackforums.net/showthread.php?tid=2224552>

see this link .i hope this is good for you

Predator_Crack - February 26, 2012, 4:40 am

From your list i would go for nos or threatconceal. Both are great products, coded by trusted guys with great support and great futures. Regarding father crypter that people above mention, i say that is cracked now and that matters for any new update on that.

Regards.

Flacon - February 26, 2012, 7:54 am

I have 9 crypters lol almost all of them besides no\$ and Star

ahmad_adnan - February 26, 2012, 8:23 am

I recommend Cryptex , I never pay money over 50\$ for someone i can't trust =) , cryptex is only 10\$ and sure FUD 100%

Seb123 - February 26, 2012, 8:51 am

Sikandars Crypter
Cryptex
Threat Conceal

Take one of these. All of them got USG , which is the most important thing. (:

Egooja - February 27, 2012, 6:28 am

Threat Conceal is the best I think, atleast longest fud times.

Galaqtic - February 27, 2012, 6:37 am

Used noscrypter for about a year now, he updates really fast when it goes unfud, but the only thing about it is that it only stays fud for 1 - 2 days max. I would recommend SADDAM`S FUD CRYPTER for long lasting fud files.

Scaliber - February 27, 2012, 8:53 am

Awesome crypter , click in my sig to see if you like it ;)

-Gilles

darkman111 - February 27, 2012, 12:12 pm

Prote(c#)tion is pretty good been using it for a while now. The only downside is its compatibility issues.

.CRz - February 27, 2012, 1:38 pm

(Feb 19, 2012 12:15 PM)Decker Wrote: [\[CITE\]](#) I've used Threat Conceal in the past and was less than pleased with it and the support, but that was months ago. I wouldn't resubscribe to it again.

Sheikh Crypter's file binder always gives me .net errors and No\$Crypter binder makes it detected to Avira. No\$ crypter keeps files crypted for the longest by far that I've seen.

First of all i think you was never my customer. also you dont see any of my customers unsatisfied.

i hate when you people say things without even think.

(Feb 19, 2012 01:56 PM)sandra1 Wrote: [\[CITE\]](#) thanks , this was very helpfull ?

why would you think TC is better? please explain

I never said TC was better than any other. i just said that the votes will not be fair becuse n0\$crypter have hundreds of customers wish means they n0\$scryter will win almost any crypter in votes.

n0\$crypter is a good crypter too buddy, i'm his friend and his crypter is pretty stable.

(Feb 19, 2012 04:17 PM)Decker Wrote: [\[CITE\]](#) He'll think that because he's the creator of it.

as you see i dont even want people to say that mine is better than any other.

Even that i have only few customers, i'm very surprised that i'm tied with icrypt.

ilpapero - February 27, 2012, 5:35 pm

stay away from gilles, guys he stolen to me 20 euros, nothing work, no able to do nothing and no refund.

.CRz - February 28, 2012, 3:07 am

(Feb 27, 2012 06:35 PM)ilpapero Wrote: [\[CITE\]](#) stay away from gilles, guys he stolen to me 20 euros, nothing work, no able to do nothing and no refund.

who stolen you 20 euros? ??

samusXaran - February 28, 2012, 7:53 pm

what did gilles do? you should post a complaint about it in his thread..

+Awesome - February 28, 2012, 8:22 pm

(Feb 27, 2012 06:35 PM)ilpapero Wrote: [\[CITE\]](#) stay away from gilles, guys he stolen to me 20 euros, nothing work, no able to do nothing and no refund.

Dude wtf are you talking about? You never purchased the crypter, why are you crying then? What's the matter?

We have autobuy system on the thread, no one can charge you more than 15\$, so that's not

possible.

ilpapero - February 29, 2012, 5:15 pm

shut up all, this is the truth! probably he has tried to fuck on their own..

22 february when i'm looking for crypter he contact me, stolen me 20 euro on paypal :

then give me a crypter that doesn't work no scantime no runtime, and told to me that can't do anythings, so.. i need refund! of course..

this is what onest people do. started with a lot of lies and excuses, he promised me a refund but after my paypal prevent contestation(i fell the way) initiated to cheat me, bla bla, totally asshole and disonest. i've to paste all the skype conversation???

99% my money come back thanks to paypal and this promotion is what he deserves. DISONEST!

+Awesome - February 29, 2012, 5:18 pm

I'll just ask him what you are talking about. :S

ilpapero - February 29, 2012, 5:29 pm

(Feb 28, 2012 08:53 PM)hkpentium Wrote: [\[CITE\]](#) what did gilles do? you should post a complaint about it in his thread..

i can't because i've no reputation and i can't write there.. but everywhere he will go, i'll be there to alert people.

i also discover that sell crypter for 15\$ and ask me 20 euros making me believe it was as a favor (like " i'm not sure, 20euro, mmmm..)

totally rotten inside!

JeromeMarshall - February 29, 2012, 5:53 pm

Take my opinion from extensive experience, youre better off buying 2 or 3 cheap crypters and using them together to keep servers fud. If you don't have the money for this than botting is not your thing. If your goal is to have a proper botnet, you need to invest money. Which means unless you have a lot of money hanging around, you'll have to monetize your botnet somehow. Either through blackhat ways, or greyish hat.

The other alternative is to buy a high priced crypter from a programmer who has motives to keep the project around. I good constant stream of new customers for a high priced crypter is a good sign the programmer has the motives to keep updating, and higher prices means smaller user pool which equals longer fud time.

Don't ask people opinions of crypters, because the majority is almost always wrong when it comes to these things, it's much like a paradox. More people raving about a good thing, usually means its not a good thing in the case of crypters.

so right on man.

First i purchased library crypt. Cheap purchase and had some unique options that would track server execution. Worked good for 2 weeks, then unfud, developer gone.

next i bought sheikh, good stable crypter, has some nice spoofing options. Detected within hours of update man.

Then i purchased saddams crypter. Seems to work great when it comes to being fud, but the execution rate sucks. I tried some installs, from a trusted guy that ive done plenty of business with, got 39 connections from 100 executions.

Next i tried icrypt, thought this would be it, no dependencies, running for a long time. Lmao, its not even fud. I purchased this weekend and have yet to get a fud crypt out of it.

Currently im and talking to cyber about threat conceal. Thing is man im so gun shy about crypters now, its ridiculous all the problems.

I used to have a crypter, about a year ago, i never once had a problem out of it. If you dont get private custom stubs i have learned they are worthless, in my opinion.

hope some of this info will help

regards
nextlevel

martine - March 5, 2012, 1:51 am

this thread made me more confused of what to buy i thought it will help me to decide :(
by the way i have read something positive about the crypter chucky anybody tried it or recommend it.

Snow.Eskimo - March 5, 2012, 4:10 am

iCrypter or No\$cripter thei stai FUD for a long time :) iCrypt has 4 years in this bussnise :)

Rtd-Shadow - March 5, 2012, 6:00 am

i would go for no\$ but NEVER buy icrypt, my personal opinion

here look at this

You're opening dead threads to spam the same BS to people that aren't even on here any more and will never see it. I saw that same post about "Learn how to encrypt my friend vb.net" at least four times today just browsing and when I checked your posts to see whether you actually provide anything even remotely valuable to the community (answers no) I saw the exact same post on seven different threads, mostly dead and bearing no relevance to your spammy posts.

TL:DR = Nobody cares. stop spam egy kid
