Thread: [Software Time / Computer Time \(Add more time?\)](#)

iLTHY - February 18, 2012, 4:36 pm

Is there any hack, or some sort of mod for this? I need to put more time on the computer because my mom is being stupid so I need more time! Anyone have any idea? I need this asap, only 15 minutes left!

Cheat engine? LAWL

I haven't tried it b4 but it might work

The process of the timer might be hidden though

It would help if you provided us with the program name, is it Net Nanny or something?
