syngress - February 20, 2012, 1:38 pm

Actually _here makes perfect sense. Yields shitloads of worthwhile leads. And with a bit more modification to this string, you could laser target specific sites.

kclubz - June 3, 2012, 10:41 am

Can you pm it to me plss??

I would like to see new dorks...)

Thanks in advance....:D

Th3PonyWizard - June 3, 2012, 12:30 pm

It's inurl:"%Inject_Here%" and not "inject code"

Also, it sucks. Terribly.

Because

%Inject_Here% Is the default string of the SQLi program known as Havij to perform custom-made injections. Basically, it crawls sites that has been used by Havij so many times they got freakin' Google indexed. Trying those sites is basically re-inventing the wheel, or whatever-relevant-quote they say.
